

IT Forum Conference

The Cornerstone for Construction Innovation

Friday, August 14, 2009 8:00 am - 5:30 pm Kansas City, MO

Join fellow construction industry technology leaders for AGC's inaugural IT Forum Conference brought to you by the AGC Electronic Information System (EIS) Committee. The forum will provide participants an opportunity to discuss and share best practices on some of the most pressing IT challenges facing the construction industry, including:

Microsoft SharePoint

Microsoft SharePoint offers a wide range of capabilities that fit the needs of the construction industry firms; both large and small. Presentation will cover:

- Budget-friendly ways to use SharePoint;
- How SharePoint can help you manage your business better;
- How much it will cost and how much money you can save; and
- The differences between Windows SharePoint Services (WSS) and Microsoft Office SharePoint Server (MOSS).

Virtualization and Disaster Recovery

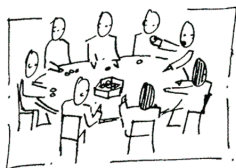

Disaster recovery is an absolute necessity! Hear about the experiences of Lease Crutcher Lewis, a GC in Seattle on finding the right virtualization and disaster recovery solutions. Their Network Systems Administrator will share:

- The benefits of virtualization in a relatively small data center;
- Pitfalls to watch out for when considering virtualization;
- Costs/benefits realized by Lease Crutcher Lewis; and
- Thoughts on Hypervisor and hardware selection.

Roundtable Discussions

Discuss with other construction industry IT professionals, in an open forum format, any IT topic. Potential discussions include:

- IT management; staffing, budgeting, ROI and strategic planning;
- Jobsite connectivity/remote connectivity;
- Open-source software implementation and utilization; or
- RFID
