

Lodging - US RevPAR +1.7% Y/Y Last Week; Tough y/y calendar comp

Mar/Apr averaging ~+4% for full-service branded -- a decent result

What's Incremental To Our View

Overall U.S. RevPAR was +1.7% Y/Y for the week ending 4/28/2018, per STR, down from the prior week's result of +8.7%. (2-year stacked RevPAR was +10.5% vs. +9.3% in the prior week.) Independent hotels (about 1/3rd of the data set) were +1.8% y/y. Luxury (+5.2%) was the strongest chain scale for branded hotels; Upper Upscale was the weakest at -0.2%. Midscale (+2.7%) outperformed and Upper Midscale (+1.4%) underperformed the overall US hotel industry average. Within Upper Upscale & Luxury class hotels, Group (-3.6% vs. +32.9% prior week) was softer than Transient (+3.3% vs. +1.4% prior week).

Last week was a very tough comp for Upper Upscale and Group. Upper Upscale was +10.8% and Group was +23.8% in the comparable week last year. We believe the tough comp was from Easter being on the 16th last year and that business travel for the week was pushed to the week of the 23rd (the comparable week of data).

- There was quite a bit of variation in Group performance by market and not all markets were negative -- but some large markets such as Boston (Group RevPAR: -14.3%), Chicago (-1.6%), Orlando (-13.8%), and Philadelphia (-42.7%) hurt the aggregate.
- There was mixed performance from hurricane-impacted markets (see below), but we believe some of the performance was attributable to the tough calendar comp.

For the month of April, we estimate that full-service branded domestic hotels (the typical Hilton [HLT, \$80.24, Buy], Hyatt [H, \$76.93, Hold], or Marriott [MAR, \$137.60, Hold] hotel) will finish at approximately +5.5-6.5% (unchanged). We estimate that the overall industry will finish approximately +3.5-4.5% (vs. our prior estimate of +4-5%). Please note that reported monthly results include hotels that are not in the weekly data set.

What is more critical to us is how we believe the "truer" run-rate of March and April shaped up (netting out the impact of the Easter calendar shift). We estimate that full-service branded domestic hotels will finish March and April combined at ~ +4%. This is not too bad of a result, in our opinion. Some of the strength has been driven by transient leisure at the luxury tier (a trend that seems to be relatively pronounced as of late).

What's Inside

Weekly STR results and analysis

RevPAR details:

- Luxury was the strongest chain scale. Midscale and Upper Midscale underperformed by 250 bps and 380 bps, respectively: Luxury RevPAR (+5.2%), Upper Upscale (-0.2%), Upscale (+0.2%), Upper Midscale (+1.4%), Midscale (+2.7%), and Economy (+1.1%). Independent hotels (+1.8%) performed in-line with headline U.S. RevPAR.
- Within Upper Upscale & Luxury class hotels, Group was softer than Transient: Transient segment (individual business and leisure travelers) RevPAR was +3.3% (vs. +1.4% last week) and Group segment RevPAR was -3.6% (vs. +32.9% last week).
- NYC (+7.3%) was the strongest of the top five markets: Boston (-10.0%), Chicago (+1.7%), LA (+6.6%), and D.C. (+1.8%).

10,40

- Other relevant markets:
 - San Francisco was up: RevPAR was +6.1% vs. +56.0% last week. We anticipate y/y comps will be relatively easy in 2Q and 3Q as the Moscone Convention Center's North and South halls were closed from April to August 2017.
 - Texas results were mixed: Dallas RevPAR was -0.4% (vs. +18.9% last week). Houston RevPAR was +8.5% (vs. +9.8% last week).
 - Hurricane-impacted markets in FL had mixed results: Miami (+8.2% vs. +9.9% last week); Orlando (-8.0% vs. +7.7% last week).

The lodging and leisure stocks:

As far as the stocks, based on our last several months of RevPAR data analytics observations, we are more positive on the hotel REITS than we were at the same time last year, though still not overly bullish like we are for the leisure focused sectors.

- Given recent forward-looking demand and pricing trends, we continue to have high confidence that numbers will not need to be cut in 2018 and that companies may actually have modest earnings beats and that dividends will be paid (though we're not expecting dividend raises of any size this year).
- We see the major issue/challenge for the hotel owners in 2018 as cost containment. In an environment of property-level operating costs of 2.5%+ vs. 1-3% RevPAR growth, this does not bode well for margin expansion for hotel owners (outside of PK [\$28.77, Buy], which has some unique self-help drivers).
- For the C-Corps, it's all good until it isn't (and it's relatively good right now). While most C-corps trade at expensive multiples by historical standards (not the case for the hotel REITs as the gap between hotel REITs and C-Corps is as wide as it has ever been), we note that historically asset-light C-Corp multiples can potentially get "wacky" (we note Four Seasons and Choice Hotels in the prior cycle, for example) and can stay expensive up to the point where a management team potentially delivers unexpected bad news (then look out below!). Based on our data research and industry conversations (private hotel owners), we are not anticipating such unexpected bad news (the "all good until it isn't" part) in April/May earnings releases as it relates to 1Q results and forward expectations.

Source: FactSet, STRH research

PK: Valuation and Risks

Our \$32 price target is based on an 12.5x multiple on our 2019 EBITDA estimate. This multiple is in-line with portfolio quality.

Downside risk: Significant supply growth and macroeconomic challenges/shocks. Press reports (FT, Bloomberg, others) have indicated possible financial difficulties at HNA, a 25% holder of PK shares. If HNA should have to liquidate PK we believe this would create near-term pressure on the shares.

LHO: Valuation and Risks

Our price target of \$24 for LHO is derived by applying a 12.5X target EV/EBITDA multiple (a premium to the industry given most of the portfolio is unbranded and therefore unencumbered by franchise/management contracts) to our estimate for 2019 EBITDA.

Upside risk: ability to increase dividend. Downside risk: heavy D.C. exposure.

Please email the Research Department at STRHEquityResearchDepartment@SunTrust.com or contact your STRH sales representative.

The rating system effective as of Oct. 7, 2016:

STRH Rating System for Equity Securities

SunTrust Robinson Humphrey (STRH) rates individual equities using a three-tiered system. Each stock is rated relative to the broader market (generally the S&P 500) over the next 12-18 months (unless otherwise indicated).

Buy (B) – the stock's total return is expected to outperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Hold (H) – the stock's total return is expected to perform in line with the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Sell (S) – the stock's total return is expected to underperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Not Rated (NR) - STRH does not have an investment rating or opinion on the stock

Coverage Suspended (CS) – indicates that STRH's rating and/or target price have been temporarily suspended due to applicable regulations and/or STRH Management discretion. The previously published rating and target price should not be relied upon

STRH analysts have a price target on the stocks that they cover, unless otherwise indicated. The price target represents that analyst's expectation of where the stock will trade in the next 12-18 months (unless otherwise indicated). If an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of STRH Research Management not to assign a target price; likewise certain stocks that trade under \$5 may exhibit volatility whereby assigning a price target would be unhelpful to making an investment decision. As such, with Research Management's approval, an analyst may refrain from assigning a target to a sub-\$5 stock.

Legend for Rating and Price Target History Charts:

B = Buy

H = Hold

S = Sell

D = Drop Coverage

CS = Coverage Suspended

NR = Not Rated

I = Initiate Coverage

T = Transfer Coverage

The prior rating system until Oct. 7, 2016:

3 designations based on total returns* within a 12-month period**

- · Buy total return ≥ 15% (10% for low-Beta securities)***
- · Reduce total return ≤ negative 10% (5% for low Beta securities)
- · Neutral total return is within the bounds above
- · NR NOT RATED, STRH does not provide equity research coverage
- · CS Coverage Suspended

*Total return (price appreciation + dividends); **Price targets are within a 12-month period, unless otherwise noted; ***Low Beta defined as securities with an average Beta of 0.8 or less, using Bloomberg's 5-year average

SunTrust Robinson Humphrey ratings distribution (as of 05/02/2018):

Coverage Univers	se		Investment Banking Clients Past 12 Months						
Rating	Count	Percent	Rating	Count	Percent				
Buy	461	64.75%	Buy	144	31.24%				
Hold/Neutral	248	34.83%	Hold/Neutral	40	16.13%				
Sell/Reduce	3	0.42%	Sell/Reduce	1	33.33%
