

ASLA has named U.S. Senator C. William Nelson, Florida a 2013 Honorary member!

Senator Nelson has been a model leader of environmental policies and practices that conserve historic, cultural and natural resources. He has been an ambassador who has forged many bipartisan efforts to protect the integrity of our national park and wildlife refuge systems. His role as a leader and consensus builder was instrumental in returning the Everglades to the United Nations' list of World Heritage sites in danger.
