- F** Ichetucknee Springs Trip

* Time and Locations subject to change. Please attend meetings for more details.

FIRM PROFILE

CHEN MOORE & ASSOCIATES

The company was founded in 1986 in Broward County by Dr. Ben H. Chen. The initial aim of the company was to provide high level consulting to both public utilities and the engineering community. They found the greatest success in the process of organic growth and currently emphasize service and client relations. They have five offices throughout Florida and opened a sister company in Panama in 2011.

This past summer, Claudia Visconti interned in the Martin County office. She had the opportunity to design on her own and produce her own projects while working in collaboration with others in the office. She worked on a variety of projects such as parks, DOT projects, utilities easements, and streetscapes in Miami. She worked with AutoCAD, Photoshop, and Illustrator as well as producing some drawings by hand. Claudia also had the opportunity to visit other offices, go on site visits, conferences, and the company's annual planning meeting.

PIC OF THE MONTH

This month's pic is the most pinned photo on Pinterest when "Landscape Architecture" is searched. This installment is located in the Lufthansa Aviation Center in Germany. The large glass building is the new administration building of the Deutsche Lufthansa AG. There are nine gardens in which landscape scenes of the five continents were created. These include 'California Beach' and 'Japanese Temple Gardens' as themes. These plantings symbolize the worldwide linking of the company.
