GENERAL ASSEMBLY OF MARYLAND WEBSITE

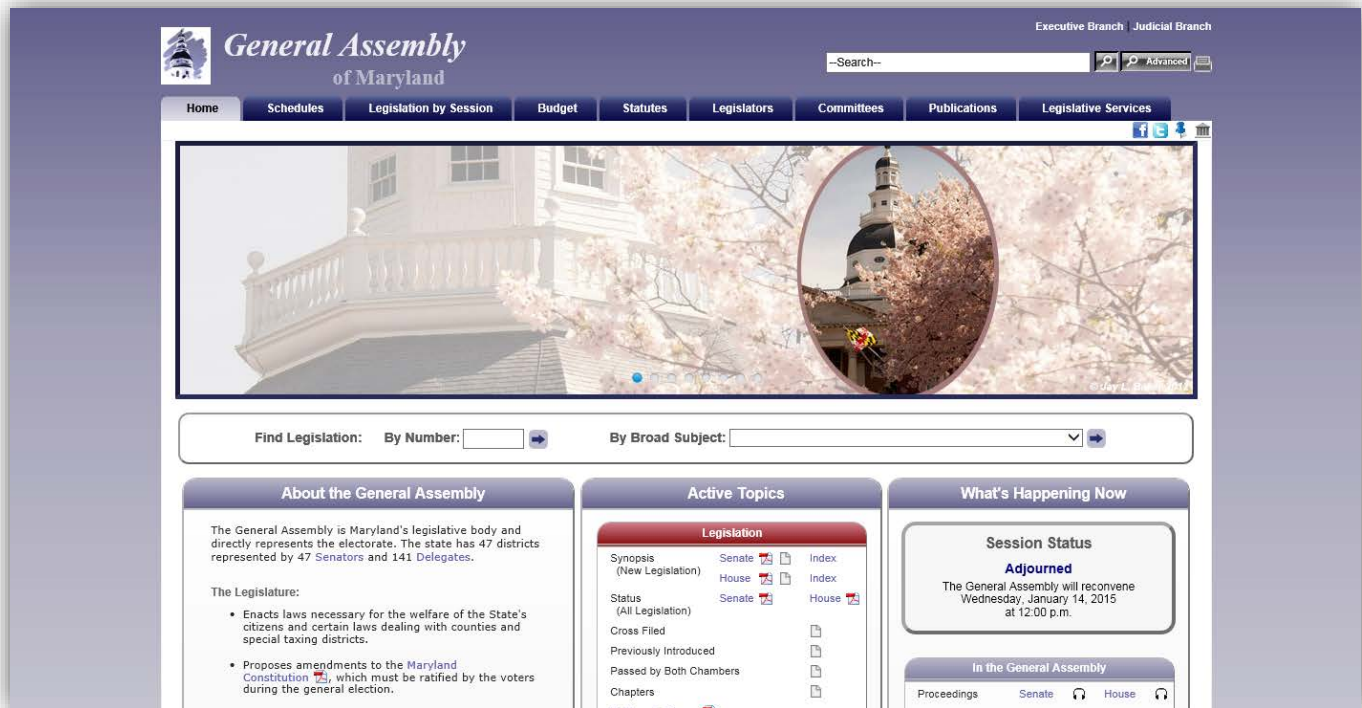

Figure 1 - GAM Website

The General Assembly of Maryland (**GAM**) has maintained a public web presence since 1996. The website was redesigned for the 2013 Session and updated for the 2015 Session. The GAM website contains information for current and past legislative sessions. The Legislative Data Systems Advisory Committee approves, along with the Speaker and President, information that appears on the GAM website. The Department of Legislative Services and Legislative Audits (**OLA**) also maintain websites containing information, reports, and other materials of legislative interest. The DLS website is accessible through a link on the GAM website and the OLA website is accessible from the DLS website.

The GAM website content changes from time to time and what follows describes in general what the site contains currently and how to navigate the site. You should remember that there may be multiple ways to get to the same content and you should explore until you find the way that works best for you.

Our goals are to:

- Make the site easy to navigate for all users.
- Maintain a modern look.
- Organize information so that it can be easily found.
- Make the site usable with all popular browsers and on all popular devices.

Note: In this user guide, the **New Information icon**  will appear next to features or enhancements introduced for the 2015 Legislative Session

The main navigation bar includes Home, Schedules, Legislation by Session, Budget, Statutes, Legislators, Committees, Publications, and Legislative Services. The sub-navigation bar includes Operating Budget, Capital Budget, Session Schedule, Spending Affordability, Recent Publications, and Budget Process. The main content area is titled 'Maryland's Budget Structure' and contains two sections: 'Budget Process Facts' and 'Executive Budget Development'.

Budget Process Facts

- The State operates under a single fiscal year that runs from July 1st to June 30th
- Maryland has a strong Executive budget model
- The Legislature can only cut or restrict funds in the budget, and cannot increase or transfer funds to other purposes
- The Legislature can add to its own budget or to the Judiciary

Executive Budget Development

- Development of the budget is primarily an executive task. The Governor formulates the **budget and supplemental budgets**. The Department of Budget and Management (DBM) supervises the executive budget-making process.
- The process starts about 15 months before the start of the budget year. At this time DBM develops **budget instructions** for use by agencies in preparing their budgets, and develops a maximum agency **request ceiling** for each agency. The request ceiling limits the amounts of general funds an agency may budget. The ceiling attempts to tailor the amount requested to the funds available while providing some flexibility to the Governor. The ceiling may or may not reflect amounts needed to:
 - Maintain current services;
 - Support operations of new facilities;
 - Implement enacted legislation, and
 - Annualize programs initiated in the current budget year.
- Agencies that use special funds also receive a request ceiling from DBM.
- Agencies are directed to submit budget requests to DBM on a staggered basis throughout the fall of each year. Agencies may also request additional funds for new or expanded programs "over the ceiling" or above the amounts needed to maintain current services. Throughout the fall, DBM staff review agency requests and "over the ceiling" items and make recommendations to the Governor.
- Final decisions on the budget are not typically made until the new year. This is because the Board of Revenue Estimates does not report its estimate of revenues to be available for expenditure in the budget year until mid-December. In addition, the legislature's Spending Affordability Committee, which advises the Governor as to its spending limit, reports in
