MCA Chicago occasionally videotapes, records or photographs at educational offerings for the purpose of responsibly promoting the association and/or attendance at future programs. By attending this class you agree to allow us to use your name and likeness for such purposes

The fields of insurance and risk management continue to confuse and confound us. This program presents the fundamentals of managing the risk of running a construction company. Subjects to be covered include an outline of risks facing a construction company, the fundamentals of managing risk, a discussion of surety bonding, property and casualty insurance, workers compensation insurance, professional liability, safety engineering, and contract document issues. Company owners, project managers, and office staff will benefit from the information taught in this course.
