

Project Management Seminar Series

FALL 2016

PERSONAL SUCCESS FOR PROJECT MANAGERS

FRIDAY, NOVEMBER 11, 2016 - 8 A.M. - 11 A.M.

Project Managers have become increasingly taxed with the responsibilities of today's construction projects. The amount of paperwork and necessary coordination can constrain efficiency and productivity. Increased hours and constant connection affect employees' life balance, and we are often vibrating between problems. While technology seems to have aided our industry, why does it seem we continue to work long hours? This presentation will focus on simple blocking and tackling techniques to help project managers prioritize and oversee the two most important resources – time and money. We will work on individual techniques that will translate into project management techniques for the projects.

TOP 10 "RISKY" ITEMS EVERY PM OR SUPERINTENDENT SHOULD KNOW

FRIDAY, DECEMBER 2, 2016 - 8 A.M. - 11 A.M.

Project Managers are often buried in the everyday management of the projects and may take contracts, subcontracts, and purchase orders for granted. "I leave all the legal mumbo jumbo for the lawyers" is a common refrain from job staff. Is this wise and prudent? As contracts continue to expand it is ever important to have well-defined scopes of work and an awareness of risk allocation. This presentation will focus on some of the known and unknown items every PM and superintendent should be aware of on the job, including indemnification, additional insured, and liquidated damages. This presentation will be in basic construction-speak, **not** legalese.

Target Audience for Series – Frontline project managers, project engineers, and superintendents with 0-10 years of experience. This is not intended to be an in-depth legal seminar for lawyers.

PROJECT MANAGEMENT SERIES REGISTRATION

\$100/member per course

\$200/non-member per course

LOCATION OF BOTH CLASSES:

8430 W. Bryn Mawr Ave.
 (I-90 & Cumberland exchange)
 First Floor Conference Center
 Chicago, IL 60631

SCHEDULE:

7:40 AM Breakfast
 8:00 AM — 11 AM Program

ABOUT THE INSTRUCTOR:

Brad Benhart has been a mainstay in the construction industry for several decades. He has been involved in commercial, residential, international, and all related aspects of training, research, and education. In 2009, Benhart furthered his commitment to construction education by accepting a Professorship at Purdue University in their Building Construction Management program. Brad is focused on construction supervision, administration, project management, strategic planning, succession planning, scheduling, and project controls. His position allows him to further develop construction education and be an industry advocate for the next generation of builders. His previous position was Vice President with Pepper Construction Company of Chicago, IL. While at Pepper, Brad managed multiple projects ranging from \$100k to \$250 million dollars. He continues to be an adjunct professor at Northwestern University in project management and has actively taught and trained many employees in the industry. In addition to his role at Purdue, Brad owns Integrated Construction Resources, a construction consulting company that focuses on strategic planning, forensic work, expert witness analysis, and owners' representation.
