

# UPGRADE YOUR CAREER IN ENERGY MANAGEMENT ONLINE

Avoid the commute with our **2-year Online Degree** that works with your busy schedule.

Energy Management is the strategic evaluation of energy use by looking at energy consumed by motors, fans, heating ventilation and air conditioning (HVAC) equipment, small & large plug loads, lighting and even people!

Learn how to evaluate energy use patterns; recommend energy efficiency techniques; integrate alternative energy sources; and perform systems analysis to solve problems.

## The Future of Energy Management Training

- » Average starting salary of graduates is \$40,000-\$50,000/year\*
- » 80% average placement rate with assistance available.
- » Degree is transferable to a 2-year completion bachelor's degree through South Seattle College.
- » Hands-on experiences will be facilitated by local professionals in your area.

\*This range is dependent on location
