Sprague Pest Solutions Named A Top 100 Company

Tacoma, Wash. – A growing structural pest control industry has helped Tacoma-based Sprague Pest Solutions (www.spraguepest.com) move up to 29th on the 2014 *Pest Control Technology* magazine Top 100 List, an annual compilation of the leading pest management companies in the United States. The list was included in the magazine's May issue (www.pctonline.com).

Sprague, a fourth-generation, family-owned company, ranked 32nd on the 2013 list and is part of a nationwide industry that grew 5.9 percent in 2013 to an estimated \$7.213 billion in service revenue.

The company provides vital pest management and consulting services to leading food industry, healthcare, hospitality, education, agriculture, education and multi-family housing facilities in the Pacific Northwest and Inter-Mountain regions. It operates service centers in Washington, Oregon, Idaho, Utah and Colorado.

Sprague Pest Solutions specializes in providing preventive and remedial pest management services to clients in the highly regulated food processing and service industries. The company works closely with food processors, packagers and retailers to help them stay compliant with expanding regulatory requirements as a result of the Food Safety Modernization Act, Global Food Safety Initiative, and closer scrutiny from federal, state and local health agencies.

In addition to protecting clients' facilities from pests including rodents, ants, cockroaches, bed bugs, nuisance birds, stinging insects, stored product pests, and flies, Sprague offers specialty technical services including heat treatments, fumigations, fumigation alternatives, large-scale bird exclusion and employee training.

"Being named to the PCT Top 100 List is evidence of the dedication our team and validates the business model we have been following for more than eight decades of delivering quality, dependable and innovative service to commercial and residential clients," says Alfie Treleven, CEO and president of Sprague Pest Solutions. "This dedication has allowed us to position our company as the premier pest management service provider in the Pacific Northwest and Western Mountain Regions, and one of the leading pest management firms in the country."

Sprague Pest Solutions, founded in 1926, is a Copesan Services partner (www.copesan.com).
