

Yamhill and Morrison Vault Lid Replacement Project late-March—June 2014

The SW Yamhill and Morrison light rail signal and communication vaults between 1st and 11th Avenues were installed as a part of the 1980's Banfield MAX project to Gresham. Over the years, these lids have experienced significant damage from traffic and must be replaced. The auto travel lanes on Yamhill and Morrison will be shut down one block at a time in order to replace the lids. You will be notified one week ahead of a traffic lane closure on your block.

Pedestrian access to businesses will be maintained at all times during construction.
The roadway will be open to traffic outside working hours.

The entire lid replacement project is scheduled to occur from late-March 2014 to June 2014. Construction hours will be 7a.m.-6 p.m., Monday-Saturday, following the standards of the City of Portland. Work will include removing vault lids, preparatory welding and grinding, placing new lids, cleaning the inside of the vaults, and replacing asphalt around the vaults.
