

# Water Reuse in Canada

Request for information on  
water reuse projects and case studies

We are seeking information on water reuse & stormwater use projects in Canada. For example, two current projects are:

## Source2Source & Trioquest

Stormwater Treatment in  
Saddleridge Business Park

Demonstrating responsible  
stormwater management to make  
stormwater safe for use.

Preparing for droughts, floods, & other  
challenges using enhanced natural  
processes.

## WaterWerx & University of Alberta

Neighbourhood Resource  
Recovery in Sturgeon County

Demonstrating fiscal & socioeconomic  
benefits of decentralized treatment of  
blackwater & greywater.

Advancing community sustainability  
through innovative water, energy &  
nutrient solutions.

If you know of any projects,  
including treated  
wastewater reuse, rainwater  
and stormwater use, &  
blackwater resource  
recovery, on any scale,  
please let us know.
