Come join us for our Hebo Fest 2016. We will be offering a refresher course for Hebo training along with new advanced techniques. This will be a great opportunity for all Hebo users to insure they are maximizing the abilities of their machines. We will also be demoing Hebo's newest architectural machines. Additionally, this will provide you with a chance to network with some of the top people in our industry. We are offering this at no cost to you. We have even arranged catering for a BBQ Dinner. We have discounted hotel rooms available along with transportation to and from the airport (PDX).
