

NEWS RELEASE

Sept. 12, 2013

Humboldt, SK

Immediate Release

PAMI opening up giant can of microorganisms

We're really going to open a big can of worms at the Termuende Ranch near Lanigan, SK in a couple of weeks. Well, not really worms; more like a giant can of microorganisms.

The media is invited to visit and get to know the little guys that produce natural gas. We think you'll get a good story out of it, along with some great photos and video of this exciting, green, bioenergy research project that the Prairie Agricultural Machinery Institute (PAMI) is working on.

- **When:** 1 p.m., September 26, 2013
- **Where:** At the Termuende Research Ranch near Lanigan, home of the Western Beef Development Centre, which is a division of PAMI (directions are below).
- **Who:** Speakers at the event will include:
 - Dr. Joy Agnew, PAMI
 - Dave Gullacher, President and CEO, PAMI
 - Jim Wassermann, Vice-President, Saskatchewan Operations, PAMI

There will be opportunities for photos and for one-on-one interviews with PAMI researchers and officials regarding this project during the afternoon.

Please advise our communications coordinator if you or any member of your news organization plans to attend.

Driving Directions from Saskatoon

1. Get on to the Yellowhead Highway (Highway 16) going east and follow it to the Town of Lanigan.
2. Proceed 8 km. (5 miles) east, southeast past Lanigan on the Yellowhead Highway (Highway 16).
3. Turn north and travel for 3 1/2 km. (2 miles).
4. Turn east and travel for 1 km. (3/4 of a mile), the Termuende Ranch is on the right. (You will see a round barn on the ranch site)
5. Parking areas for the media will be identified at the site.
