

Wanted: excess metal inventory

Metal Connection is a Saskatoon based company looking for prime excess material from manufacturers. Metal Connection provides an online solution for manufacturers to buy and sell excess or aged metal inventory. Companies have the ability to advertise material on our website directly, or for those manufacturers who do not want to get involved in the selling process, or prefer to keep their identity discrete, Metal Connection will advertise and sell material on their behalf. We handle the entire process by listing the material on our site and proactively locating buyers.
