

**Subject:** Press release for Strip Cat Strip Till System

MK Martin Enterprise Inc. has been granted licence by Twin Diamond Industries to manufacture and handle distribution of the Strip Cat strip till system for the Canadian and Eastern U.S.

Manufacturing and Distribution is taking place at our Elmira Plant. Strip Cat strip till machine is designed to be adjustable and accomodate numerous options to facillitate all field and crop conditions.

Strip Cat strip till system is available in 4, 6, 8, 12, 16, row at 30" row centers. Machines are available in 3 point hitch and trailed versions. Can be used in dry or liquid fertilizer programs.

Strip Tilling is a efficent way for the Grower to prepare a seed bed along with placement of fertilizer. Strip Till is a proven tillage system for row crop growers in the Midwest and we at MK Martin Enterprise are looking forward to rapid growth in our marketplace.
