NEWS RELEASE

S3 BLOWERS BECOMES S3 AIR SYSTEMS

S3 Air Systems will replace the name S3 Blowers, as of June 5, 2017. According to General Manager, Al Marques, the new name better reflects the company's offering.

"We engineer unique air power and delivery technologies to maximize the performance of our client's system, which are then precision manufactured to exacting quality standards." Marques adds, "anyone can bang out metal; what we bring to the table is refined design models and focus on the science of pneumatics, honed by decades of experience in actual field testing."

As part of the S3 group of companies, S3 Air Systems was founded in 1966 to manufacture distinctive solutions for the farm equipment industry. Discover more about the company at S3airsystems.com.
