"Promoting innovations in the agriculture industry has always been a focus of the Farm Progress Show," said Harvey Kuhar, Chair of RBC Innovation Committee. "I extend my congratulations to the recipients who worked diligently to improve technologies and services to move our industry forward."

The Western Canada Farm Progress Show Innovations and Energy Centre volunteer committee qualified each product which was considered as an innovation. The qualified products were then judged by a panel of six industry experts. The Innovation Program promotes all new inventions and also considers promoting improvements or enhancements made to existing products.
