ASABE to Revise Standard on Loads Exerted By Free-Flowing Grain on Bins

ST JOSEPH, MICHIGAN— The American Society of Agricultural and Biological Engineers (ASABE) has initiated a project to revise the standard for loads exerted on grain bins.

ANSI/ASAE EP433, Loads Exerted by Free-flowing Grain on Bins, was adopted by ASABE in December of 1988. The proposed revision will update reference citations, a need that was identified in the latest periodic review of the document.

ASABE is recognized worldwide as a standards developing organization for food, agricultural, and biological systems, with more than 240 standards currently in publication. Conformance to ASABE standards is voluntary, except where required by state, provincial, or other governmental requirements, and the documents are developed by consensus in accordance with procedures approved by the American National Standards Institute. For information on this or any other ASABE standard, contact Scott Cedarquist at ASABE, 269-932-7031, cedarq@asabe.org. A current listing of all ASABE standards projects can be found on the ASABE web site at <http://www.asabe.org/standards/projects,-adoptions,-revisions,-withdrawals.aspx>.

The American Society of Agricultural and Biological Engineers is an international scientific and educational organization dedicated to the advancement of engineering applicable to agricultural, food, and biological systems. Its 9,000 members, from more than 100 countries, are consultants, managers, researchers, and others who have the training and experience to understand the interrelationships between technology and living systems. Further information on the Society can be obtained by contacting ASABE at (269) 429-0300 (phone) or (269) 429-3852 (fax); hq@asabe.org. Details can also be found at <http://www.asabe.org/>.
