

# Foam-It-Right Webinar Series

© 2018 Spray Polyurethane Foam Alliance

## ***Eye Protection***

Brian Cote, Installed Building Products  
October 10, 2018, 4:00-5:00 PM ET

SPFA Safety Committee will host a members-only bi-monthly "Foam-It-Right"® Safety Webinar that will include information about proper eye protection.

This webinar covers eye protection as it has evolved from the beginning through today. It will touch on the history of this particular PPE as well as OSHA and ANSI's requirements. The training also touches on eyewash station requirements for Spray Foam.

---

### **Presenter**

**Brian Cote**  
**Installed Building Products**

Brian started in Spray Foam in the mid 1990's under the tutelage of Henry Fennell and Foam Tech in Vermont. During his 20 plus years in SPF he has worked as an applicator, supervisor, project manager, building science expert, product development and R&D, as well as a Manufacturers Technician and Sales person for one of the leading SPF manufacturers. He has worked on thousands of residential, commercial and high-profile projects across the United States with both interior and exterior applications as well as injectable systems. As one of the Risk Managers for Installed Building Product, he helps oversee the training in all aspects of SPF to include, Certification, Building Envelope and Building Science as well as Sales, Management and Safety. Bringing solutions to an ever-changing environment to help grow the division as well as limit liability. Brian holds numerous certifications in the SPF industry and is a member of the Building Science Corporation.
