

Plas-Pak Industries, Inc.  
Norwich, CT

For immediate distribution: **Dual Syringe Product Line Extension.**

Plas-Pak Industry's 6B23 (3ml X 3ml) dual syringe is now ready for customer sampling, testing, and approval.

The 6B23 features and options include:

- Can be used with a variety of low cost static mixers for convenient meter-mix, dispensing of plural component epoxies, urethanes, or 1:1 ratio compositions.
- Can be used without static mixer for low cost DIY hand mix applications.
- Available in ultra-clear polypropylene, opaque polyethylene or nylon material for best chemical resistance. Custom colors are available.
- Patented **unimolded** plunger rod. Molded in place barrel air vents that allow precise insertion, auto deaeration and highly automated filling operations.
- High capacity tooling for lowest overall cost and assured supply of high volume customer applications.
- Convenient **snap-off** tip closure with molded in place reusable cap for secure, leak-free performance.

Plas-Pak's extensive dual syringe product line now includes 30ml, 14ml, 6ml and 4 ml sizes that come in a 1:1 ratio. The 30ml syringe is also available in a 2:1 ratio.
