

FACULTY OPENING ANNOUNCEMENT—ADJUNCT

The Department of Construction Science at Texas A&M University is conducting a new search for multiple Lecturers, or Assistant or Associate Instructional Professors, non-Tenure Track. The Department is seeking new teaching professionals who are interested in a full time academic career in teaching and service in construction methods and materials; building architectural, structural, mechanical, plumbing and electrical systems; estimating; scheduling; project controls; and the technology involved with these subject areas including building information modeling (BIM).

The Department of Construction Science is one of the largest programs of construction higher education in the world. The Construction Science program is housed in the College of Architecture. The College of Architecture, with over 2600 students, is the largest College of Architecture in the nation. In addition to Construction Science, the College has Departments of Architecture, Landscape Architecture & Urban Planning, and Visualization. The College provides extraordinary opportunities for interdisciplinary research and teaching. Currently there is a faculty of thirty within the Construction Science program. Program enrollment is approximately 1050 undergraduate students and 75 Master's students. Ph.D. students with an emphasis in construction matriculate under the Architecture Ph.D. program. The undergraduate program has been continuously accredited by the American Council for Construction Education [ACCE] since 1978; in 2012 the master's program in Construction Management was the first graduate program accredited by ACCE. The Department enjoys six professorships and a chair. The Department is located in Francis Hall, a newly renovated 35,000sf historic building located in the heart of the campus, the only standalone building for construction education in the state of Texas. The Department web site <http://cosc.arch.tamu.edu> contains a full description of the program.

The faculty position is full time, hired on a nine-month contract, with the opportunity for continuing education, or teaching assignments in the summer months. Salaries are highly competitive and depend on the candidate's credentials.

The position is available immediately with a late summer 2016 expected date of hire. The review of applications will begin upon receipt and conclude on January 15, 2016. The best qualified applicants will be invited to visit the campus.

Position requirements:

- Candidates are expected to teach in the undergraduate and graduate programs and to make long term significant contributions to teaching and curriculum development.
- Candidates are expected to participate in Departmental service activities to include assigned committee work, competition team coaching, student chapter coordination, event planning, industry related events, field trips, and continuing education for industry.

Qualifications required:

- Candidates must have at least a Master's degree in a construction or a construction-related discipline.
- Candidates must have at least five years of construction experience.

Applications must include the following:

- A narrative statement of interest demonstrating that the candidate meets the requirements of this announcement
- A curriculum vita
- At least three references with complete contact information

Electronic applications should be emailed to the Chair of the Search Committee at

coscsearch@arch.tamu.edu.

Information on applying for a faculty position is available at:
