

# CLEVEST Clevest offers complete solution for the utility mobile workforce

The exclusive mobile workforce partner of [Hometown Connections](#), [Clevest](#) helps utilities deliver safe, reliable and superior services through innovative and configurable mobile workforce management and smart grid operations software solutions. The company specializes in optimizing utility field operations, automating field activities and processes to improve safety, reliability, and response time. Over 180 utilities have selected Clevest as their mobile workforce partner, based on its experience from hundreds of successful implementations.

Clevest offers flexible deployment options to suit the utility's software implementation preferences. On-premise or in the cloud, Clevest provides a powerful configuration tool for utilities to create custom integrations, work order types, and work flows without changing the core product – saving time and money on implementations and upgrades.

Clevest's award-winning mobile platform powers a product suite that includes:

- [Mobile workforce management](#) to automate any utility field work activity
- [Meter service work](#) to improve management and efficiency
- [Automatic vehicle location](#) for real-time visibility into field operations
- [Automated worker location](#) to increase safety and productivity
- [AMI deployment](#) to deploy faster and safer with fewer resources
- [Meter reading](#) to enable a bridge between AMI and AMR on a single mobile platform
- [Mutual aid](#) to manage shared resources on a single map
