

# McMinnville Electric System Celebrates Public Power Week

*Public Power Week was October 1-7*

McMinnville Electric System participated in their city's Autumn Street Fair. It was a great opportunity to visit with their customers. MES employees were able to see thousands of people while talking to them about the benefits of Public Power and Energy Efficiency with eScore. They painted 931 (the local area code) rocks and popped popcorn for our customers. Those beautiful 931 rocks are being hidden and retrieved all over middle Tennessee. One masterpiece was left by MES's sign over the weekend and one was found during the Street Fair and left at their booth.
