

As we come to the close of 2016 and look forward to a busy 2017, we wanted to share with you the news of the continued success of our TMEPA Training room and our Board Room. We have hosted many meetings this year, utilizing both the training room and the board room. Educational sessions that last for multiple days, Executive

Committee meetings, Legislative Committee, Board and staff meetings and many other groups and gatherings. One member system used our facilities for an annual board retreat. Everyone continues to praise the central location, parking and personal service provided by staff. We even hosted a surprise baby shower for one of our WinUp (Women's International Network of Utility Professionals) Members.

TVPPA continues to hold the record for most meetings booked, but we've also hosted meetings by TVA, CDMA (Central District Managers Association), E-Source, Winup and the JT&S group.

TMEPA members and their staff are always welcome to use the training room, the boardroom, and the guest office space for meetings or simply if they need a quiet spot to get some work done as they're traveling through the area. Our Training Room will hold up to 30 folks comfortably in a

classroom style setting. Our board room seats 14 around the table and 5 extra club chairs along the wall. The extra office has been used by several TMEPA System members and is a great place to take conference calls, or participate in a webinar should you need an office away from home.

Our audio/visual system is modern and easy to use. We have virtually unlimited guest Wi-Fi internet access allowing for up to 99 connections at one time. We endeavor to be gracious hosts, and our usage fees are nominal compared to costs at hotels and other meeting facilities. Of course, System Members of TMEPA don't pay a facilities charge to use the training room or boardroom as all facilities are here for their benefit. Come on over and check us out. We think you will be impressed enough to add us to your short list of potential future meeting sites.
