

Virginia BEST (Building Excellence in Safety, Health & Training) is designed to encourage and recognize AGCVA members who voluntarily implement highly effective safety management systems to benefit employees and reduce or eliminate injuries, illnesses and fatalities on construction sites in Virginia. **Our goal is for Virginia to lead the nation in a construction culture that exhibits best practices in safety and health management.**

Since the Winter Convention, AGCVA has held Q & A sessions in four districts with members from 7 districts attending. VA BEST is led by a Review Board of AGCVA members who expertise is safety who mentor other firms and discuss best practices on construction sites and to and from those sites. Currently, 5 GCs and Subcontractors have submitted formal requests to enter the program and another 10 firms are on their way to being matched with a mentor. One GC has completed level 1.

There is no cost for an AGCVA member to go through the program other than the time and effort to complete the program and the benefits are priceless: reduce employee injury, improve employee morale, and position AGCVA members as most competitive for quality work.
