For Immediate Release

Stantec invites you to experience a new way to fly in Winnipeg

Winnipeg, MB (October 28, 2011) NYSE, TSX: STN

Air travellers in Winnipeg will experience an entirely new flying experience when the new Winnipeg James Armstrong Richardson International Airport officially opens **Sunday, October 30**.

This marks Stantec's ninth major airport project in Canada. One out of every three passengers flying in North America today will travel through an airport where Stantec has completed a significant project.

Stantec, along with partners Pelli Clarke Pelli Architects, worked to create a world-class airport designed with passenger experience and comfort in mind.

"We have introduced a number of exciting architectural highlights and innovations into the space," said David Essex, a Stantec architect and project manager for the airport. "For example, the new arrivals hall interconnects all levels and functions within the terminal, and creates a memorable 'Welcome to Winnipeg' experience."

Architectural highlights include:

- A dramatic lounge space with a unique curved form and swooping roof.
- Glass boarding bridges enable passengers to view the entire airfield and feel more connected to their travel experience.

"Stantec is one of the world's leading airport architectural firms. We have completed over 40 airport terminal projects around the globe," says Essex.

About Stantec

Stantec provides professional consulting services in planning, engineering, architecture, interior design, landscape architecture, surveying, environmental sciences, project management, and project economics for infrastructure and facilities projects. We support public and private sector clients in a diverse range of markets at every stage, from the initial conceptualization and financial feasibility study to project completion and beyond. Our services are provided on projects around the world through approximately 11,000 employees operating out of more than 170 locations in North America and 4 locations internationally. Stantec is **One Team** providing **Integrated Solutions**.
