Spruce Computer Systems Announces Record Year

Industry Leading Software SpruceWare.Net for Hardware and Building Materials Dealers

Spruce Computer Systems concluded its most successful year ever adding 53 new dealers, representing 730 users to its market leading SpruceWare.Net software. SpruceWare.Net is now installed in a total of 298 dealers, in 588 locations, representing a total of 5,604 users. Spruce achieved this record growth by converting its base of legacy platform users on SpruceWare and SprucePlus to SpruceWare.Net, and also by successfully moving dealers away from competitor's software to SpruceWare.Net.

Spruce also introduced this year its SaaS (Software as a Service) model using Internet cloud-based services. Businesses more and more are deciding to select a hosted/cloud option to better stay up to date with fast changing technology and increasingly complex hardware, software, communication, and network infrastructures. Hosted users have eliminated on-site servers by using their internet connection to access the SpruceWare.Net state-of-the-art program.

Many dealers, including those in Canada, have already joined the move to SpruceWare.Net. They include:

Windsor Plywood Clareview- Edmonton, AB – Windsor Plywood
Walkerton Timbermart - Walkerton, ON – Timber Mart
Allen Building Center - Woodstock, ON – Castle
Woollatt Building Supply –London, ON - TORBSA Group
Rodney Building and Metal Products – Rodney, ON – Sexton
Border View Lumber - Cartwright, MB - Sexton

About Spruce Computer Systems

Spruce Computer Systems Inc. is a technology company creating modern software exclusively for independent lumber, hardware, and building material dealers. Our head office is in Latham NY, with Canadian offices in Calgary, Alberta and London. Ontario. SpruceWare.Net software is 100% Microsoft Windows and uses unique Document Management Tools to save dealers time, money and improve their customer service. SpruceWare.Net is “Programmed with a Future”.
