

FOR IMMEDIATE RELEASE

TASK TOOLS Launches Innovative Rigid Insulation Reciprocating Blade

This blade outperforms all competing products.

Delta, BC, June 27, 2016 – TASK TOOLS has developed a 12” Reciprocating Saw Blade for Rigid Insulation to provide contractors with a superior alternative for cutting and shaping rigid insulation quickly and easily. Terry Hamer, Product Manager at Task Tools said, “Until now, professionals have had little to choose from, using anything from bread knives to chain saws to expensive hot wire tools. Contractors will find this new blade offers superior strength, accuracy, speed and flexibility.”

Precision crafted in Switzerland using premium quality, high carbon steel, this blade offers both strength and flexibility. The blade features a sharp plunge tip and a wavy knife-edge for clean fast cuts and angular precision. The plunge-cutting ability and ease-of-use make quick work of contour cutting for pipes, windows, doors, junction boxes, and vent outlets. Unlike hot wire tools, this blade can be used in any weather and is environmentally friendly, causing less material waste and reducing pollution caused by other methods such as chainsaws.

Availability

Task® Reciprocating Blades are available at building supply stores throughout Canada and the US. They can also be purchased online at www.task-tools.com with fulfillment through local dealers.

About TASK TOOLS

Founded in 1968, TASK TOOLS is a Canadian, family owned and operated business that provides quality products, exceptional customer service, and award-winning packaging & merchandising. They also provide the industry’s best warranty support to hardware and building supply retailers across North America.

TASK TOOLS offers three brands – TASK Signature®, TASK® and Tuf-E-Nuf® – which sell in five categories: power tool accessories, hand tools, abrasives, worksite accessories, and LED Lighting.
