

Managing Confined Space Safety

Confined space entries can be one of the most hazardous duties our local government employees face. Often, we take these dangerous areas for granted until a serious incident occurs. As with many potentially dangerous environments, the safe management of your organization's confined spaces is accomplished by having all applicable staff trained in the dangers and the proper techniques to get the job done effectively and safely.

Local Government Risk Management Services is presenting a half-day training course to provide all personnel who are responsible for entering these confined spaces information they need to effectively work and avoid injury.

This course will focus on activities to prevent accidents and lower the financial impact of losses. Topics include:

- Safe equipment and procedural development
- OSHA Standards
- Team development
- Discussions of specific harness, breathing, and emergency retrieval equipment.

Pre-registration is required. Each session will be limited to a maximum of 35 participants.

**Check-in begins at 8:00 a.m. - Seminar hours are 8:30 a.m. to 12:30 p.m.
Continental Breakfast will be provided.**
