Georgia Department of Transportation
Local Technical Assistance Program
276 Memorial Drive
Atlanta, GA 30303

The Plan Development Process (PDP) is an important tool that enables the Department to provide a safe, seamless, and sustainable transportation system that supports Georgia's economy and is sensitive to its citizens and environment. Local Government plays a key role in helping to fulfill GDOT's mission of providing a safe, seamless and sustainable transportation system. An overview of the Plan Development Process and the Federal and State laws that impact it will facilitate technology staff in designing, developing and implementing beneficial systems to the Department's continued successful operation.

The Department of Transportation is an Equal Opportunity/Affirmative Action institution and as such encourages participation in all its programs without regard to age, race, sex, creed, national origin or religion.

Objectives

This course provides an overview of the Plan Development Process (PDP) used by the Georgia Department of Transportation to design and let road and bridge projects. By the end of this course, participants will be able to :

- Describe the Plan Development Process and its phases
- Describe how projects are identified and programmed, scheduled and managed
- Describe how environmental requirements impact the PDP process
- Describe how project concepts are developed and approved
- Describe the process by which the Preliminary Design is developed and approved.
- Describe the actions necessary to prepare and gain approval of the Final Construction plans

Registration
