**Milwaukee® Introduces 4PC Nut Driver Set with Universal Driver Head**

Milwaukee Tool continues to provide major advancements in Hand Tool design with the introduction of their new 4PC SAE Nut Driver Set. The only tools in this category with universal driver heads, the new Nut Drivers fit 4X more fasteners including Square, Hex, 12 point & Spline, and have the ability to remove rusted and stripped bolts.

“Traditional hex nut drivers don’t provide the user any fitment versatility and this has become a major source of frustration on the jobsite,” says Ryan Schwoegler, Product Manager for Milwaukee Tool Corp. “Milwaukee Nut Drivers are the latest example of our organization bringing new solutions to the hand tool category and providing relevant innovation to our end users.”

In addition, the Milwaukee® 4PC SAE Nut Drivers feature a 3” hollow shaft design, allowing users to drive fasteners on long bolts or threaded rod applications with ease. The drivers also feature wrench-ready hex steel shanks that are forged and chrome plated for maximum durability and additional leverage. For added user convenience, multiple ID markings allow for quick tool identification on the jobsite.

Part of a larger Hand Tool launch in May 2013, the 4PC Nut Driver Set will accompany several new fastening solutions from Milwaukee that deliver game changing durability, ergonomics and versatility. With a focus on user driven innovation to provide real solutions to jobsite challenges, Milwaukee will also introduce (4) 10IN1 Multi Bit Drivers, (3) Hex/Torx® Key Drivers, (3) Screwdriver Sets and (3) UL® Classified 1000V Insulated Screwdriver Sets.

Backed by a limited lifetime warranty, the new products confirm Milwaukee’s commitment to best-in-class durability and their relentless commitment to provide innovative solutions to the end user that will increase productivity.

**4PC Hollow Shaft SAE Nut Driver Set (48-22-2404) Includes:**

- 9/16" - 3" Shaft Nut Driver
- 7/16" - 3" Shaft Nut Driver
- 5/16" - 3" Shaft Nut Driver
- 1/4" - 3" Shaft Nut Driver
