Reasons for this report

✓ Our analysis of the most recent weekly US lodging results

Lodging: US RevPAR +1% y/y last week, +15% vs. 2019. Tough Sunday comp due to Rosh Hashanah; midweek decent

Overall U.S. RevPAR was +1.2% y/y for the week ending 9/23/2023, per STR, above the prior week's result of +0.1%, and slightly below the trailing 10-week average of +1.5%. Versus 2019, RevPAR was +15.4%, above the prior week's result of +12.8% and above the trailing 10-week average of +13.4%.

Last week's results were affected by the timing of the High Holidays, primarily Rosh Hashanah. Sunday RevPAR was -6% y/y versus Monday +0.6% and Tuesday/ Wednesday +3-4%. While we assume some lost demand last week due to the holidays, midweek performance was relatively decent all things considered.

We do not recommend too much focus on day-by-day performance due to the holidays but Tuesday/Wednesday RevPAR was respectable in Upper Upscale and Upscale at +4% and +7% respectively during the peak of the business travel week.

As previously discussed, we expect weaker demand at the start of next week's results (week ending 9/30) due to Yom Kippur.

Major RevPAR statistics presented below:

- Luxury RevPAR: -0.5% y/y and +10.9% versus 2019;
- Upper Upscale RevPAR: +2.7% y/y and +8.7% versus 2019;
- Upscale RevPAR: +4.2% y/y and +11.7% versus 2019;
- Upper Midscale RevPAR: +1.8% y/y and +15.3% versus 2019;
- Midscale RevPAR: -1.1% y/y and +16.2% versus 2019;
- Economy RevPAR: -4.0% y/y and +12.1% versus 2019;
- Independent hotels (~ 1/3rd of the data set) RevPAR: -1.5% y/y and +18.8% versus 2019; and
- Within Upper Upscale & Luxury class hotels:
 - Group: +1.8% y/y vs. -0.3% prior week; versus 2019: +9.7% vs +2.2% prior week.
- Transient: -0.9% y/y vs. -1.8% prior week; versus 2019: +15.5% vs +15.0% prior week.
- Las Vegas RevPAR: -5.1% y/y and +27.3% versus 2019.
 - As a caveat, we note that many large Strip casino hotel operators do not participate in STR's survey.

Last week's RevPAR details and sequential trends (all comparable information on new STR methodology):

- Headline RevPAR was +1.2% y/y vs. the running 28-day average of +0.8% y/y.
- Occupancy: Absolute occupancy was 68.5% vs. 64.8% for the running 28-day average.
- Absolute Group occupancy: 26.3% last week vs. 20.3% for the running 28 days.

The lodging stocks: Overall, we continue to summarize our view on the lodging sector at the moment as one of "relative optimism," *though more so for the global C-Corps and less so for the hotel REITS.*

• Of the lodging stocks our favorite name continues to be Hyatt Hotels Corp. (H, Buy), which we see having several idiosyncratic catalysts. Hyatt is a beneficiary of group strength primarily through its legacy portfolio but also to an extent due to the acquired Apple Leisure Group, the recovery of international higher-rated travel, and particular strength in leisure demand to the Caribbean and Europe, a continued push to asset-light, a leading global rooms pipeline, and improved FCF story. Hyatt generates approx. 30% of earnings from the group segment and 30% from its Caribbean-centric Apple Leisure Group business.

Truist Securities

5

For the hotel REITS, our favorite name is RHP (Buy). With 75% of its business coming from groups/conventions, Ryman Hospitality
Properties has the greatest exposure to this customer segment and has no hotels located in the especially tech-heavy San Francisco
area. We add that RHP's hotels are likely benefiting from several "self-help" factors including having properties in better condition
than some other big box comparables and convention centers as well as what has proven to be a smart strategy of maintaining their
property-level salesforce during the peak of the pandemic.

Truist Securities Rating System for Equity Securities

Truist Securities, Inc. ("Truist Securities") rates individual equities using a three-tiered system. Each stock is rated relative to the broader market (generally the S&P 500) over the next 12-18 months (unless otherwise indicated).

Buy (B) – the stock's total return is expected to outperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Hold (H) – the stock's total return is expected to perform in line with the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Sell (S) – the stock's total return is expected to underperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Not Rated (NR) - Truist Securities does not have an investment rating or opinion on the stock

Coverage Suspended (CS) – indicates that Truist Securities' rating and/or target price have been temporarily suspended due to applicable regulations and/or Truist Securities Management discretion. The previously published rating and target price should not be relied upon.

Truist Securities analysts have a price target on the stocks that they cover, unless otherwise indicated. The price target represents that analyst's expectation of where the stock will trade in the next 12-18 months (unless otherwise indicated). If an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Truist Securities Research Management not to assign a target price; likewise certain stocks that trade under \$5 may exhibit volatility whereby assigning a price target would be unhelpful to making an investment decision. As such, with Research Management's approval, an analyst may refrain from assigning a target to a sub-\$5 stock.
