Reasons for this report

- ✓ Our analysis of the most recent weekly US lodging results

Lodging: US RevPAR -0.8% y/y last week, +0.1% vs. 2019. Week after Thanksgiving now a WFH week.

Overall U.S. RevPAR was -0.8% y/y for the week ending 12/2/2023, per STR, slightly below the prior week's result of -0.6%, and below the trailing 10-week average of +2.7%. Versus 2019, RevPAR was +0.1%, below the prior week's result of +18.7%, and below the trailing 10-week average of +17.0%.

We have two major takeaways from last week's results. 1) A potential scenario like in 2022 where there was extended leisure travel (leisure being a relatively underperforming customer segment) into the week following Thanksgiving and subsequently a lower mix of business/group travel (these being outperforming customer segments of late, especially group), and 2) Shift of Art Basel (Miami) by one week, hurting Miami and Luxury results.

As some may remember from the same week last year, STR results were soft in the week after Thanksgiving for 2022 on a clean comp. A theory that emerged, perhaps led by Pebblebrook's (PEB, Hold, Miller) commentary in their 4Q22 lower guidance revision: "weaker business and leisure demand during the second half of [November], which may relate to new seasonal patterns around holidays due to hybrid work." While business travel trends in 2023 relative to last year have improved in many "normal" non-holiday weeks, perhaps we are once again seeing the impact of hybrid work in an extended leisure week post-Thanksgiving (or more generally following some major holidays). If next week's lodging results show a midweek occupancy rebound from last week's modest 50s/60s occupancy, perhaps we are seeing a continuation of the trend that PEB called out last year. Last year for the week ending 12/10, midweek occupancy was back in the mid 70s for full-service hotels.

Beyond the macro, Art Basel in Miami shifted one week later this year to December 8-10 from last year's December 1-3. Miami results last week: occupancy -14% y/y, ADR -42.5%, and RevPAR -50.6%. As Art Basel attracts high-rated demand, we assume U.S. Luxury and Resort results were more clearly impacted as both RevPARs for the overall U.S. were down ~ 10% y/y and perhaps a point or two of negative RevPAR impact nationally as a result. We should see stronger results in Miami, Luxury, and Resort next week.

Major RevPAR statistics presented below:

- Luxury RevPAR: -9.8% y/y and -10.2% versus 2019;
- Upper Upscale RevPAR: +1.8% y/y and -10.0% versus 2019;
- Upscale RevPAR: +1.0% y/y and -7.4% versus 2019;
- Upper Midscale RevPAR: -1.1% y/y and +3.8% versus 2019;
- Midscale RevPAR: -3.5% y/y and +10.2% versus 2019;
- Economy RevPAR: -5.9% y/y and +11.4% versus 2019;
- Independent hotels (~ 1/3rd of the data set) RevPAR: -1.2% y/y and +5.1% versus 2019; and
- Within Upper Upscale & Luxury class hotels:
 - Group: +0.9% y/y vs. +8.3% prior week; versus 2019: -12.0% vs +8.2% prior week.
 - Transient: -2.5% y/y vs. -0.1% prior week; versus 2019: -2.8% vs +18.8% prior week.
- Las Vegas RevPAR: +12.2% y/y and +36.8% versus 2019.
 - As a caveat, we note that many large Strip casino hotel operators do not participate in STR's survey.

Last week's RevPAR details and sequential trends (all comparable information on new STR methodology):

- **Headline RevPAR** was -0.8% y/y vs. the running 28-day average of +2.8% y/y.

- **Occupancy:** Absolute occupancy was 54.2% vs. 57.7% for the running 28-day average.
- **Absolute Group occupancy:** +17.0% last week vs. 18.3% for the running 28 days.

The lodging stocks: Overall, we continue to summarize our view on the lodging sector at the moment as one of “relative optimism,” *though more so for the global C-Corps and less so for the hotel REITS.*

- **Of the lodging stocks our favorite name continues to be Hyatt Hotels Corp. (H, Buy), which we see having several idiosyncratic catalysts.** Hyatt is a beneficiary of group strength primarily through its legacy portfolio but also to an extent due to the acquired Apple Leisure Group, the recovery of international higher-rated travel, and particular strength in leisure demand to the Caribbean and Europe, a continued push to asset-light, a leading global rooms pipeline, and improved FCF story. Hyatt generates approx. 30% of earnings from the group segment and 30% from its Caribbean-centric Apple Leisure Group business.
- **For the hotel REITS, our favorite name is RHP (Buy).** With 75% of its business coming from groups/conventions, Ryman Hospitality Properties has the greatest exposure to this customer segment and has no hotels located in the especially tech-heavy San Francisco area. We add that RHP’s hotels are likely benefiting from several “self-help” factors including having properties in better condition than some other big box comparables and convention centers as well as what has proven to be a smart strategy of maintaining their property-level salesforce during the peak of the pandemic.

Truist Securities Rating System for Equity Securities

Truist Securities, Inc. ("Truist Securities") rates individual equities using a three-tiered system. Each stock is rated relative to the broader market (generally the S&P 500) over the next 12-18 months (unless otherwise indicated).

Buy (B) – the stock’s total return is expected to outperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Hold (H) – the stock’s total return is expected to perform in line with the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Sell (S) – the stock’s total return is expected to underperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Not Rated (NR) – Truist Securities does not have an investment rating or opinion on the stock

Coverage Suspended (CS) – indicates that Truist Securities’ rating and/or target price have been temporarily suspended due to applicable regulations and/or Truist Securities Management discretion. The previously published rating and target price should not be relied upon.

Truist Securities analysts have a price target on the stocks that they cover, unless otherwise indicated. The price target represents that analyst’s expectation of where the stock will trade in the next 12-18 months (unless otherwise indicated). If an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Truist Securities Research Management not to assign a target price; likewise certain stocks that trade under \$5 may exhibit volatility whereby assigning a price target would be unhelpful to making an investment decision. As such, with Research Management’s approval, an analyst may refrain from assigning a target to a sub-\$5 stock.
