

# Lodging - US RevPAR +0.3% Y/Y Last Week; Clean comp. Uninspiring result.

Weak occ growth (-1% to -2% for full-service brands); Supply growth pressuring

#### What's Incremental To Our View

Overall U.S. RevPAR was +0.3% Y/Y for the week ending 3/2/2019, per STR, slightly stronger than the prior week's result of +0.0%. (2-year stacked RevPAR was +4.5% vs +2.1% in the prior week.) Independent hotels (about 1/3rd of the data set) were +0.6% y/y. Luxury (+0.7%) was the strongest chain scale for branded hotels; Upscale was the weakest at -1.3%. Upper Midscale (+0.0%) also underperformed the industry average. Within Upper Upscale & Luxury class hotels, Group (-0.7% vs. +1.9% prior week) was slightly softer than Transient (-0.4% vs. -0.5% prior week).

We believe last week was a clean y/y comp with soft results across the chain scales. While ADR growth was "okay" (+1.3% for the industry and led by +2.7% for Luxury and +2.0% for Upper Upscale), occupancy was -100 bps for the industry and down 100-200 bps for full-service branded hotels (AKA the typical Hilton, Hyatt, and Marriott hotel). We first called out this trend in January and expect the occupancy loss will persist at least in the near-term and believe it difficult to change direction this far into the cycle. We believe supply growth is a headwind especially in Upscale and Upper Midscale (higher and midrated select-service hotels in particular).

For the month of February, we estimate that full-service branded domestic hotels (the typical Hilton [HLT, Buy], Hyatt [H, Hold], or Marriott [MAR, Hold] hotel) will finish at approximately +1.5-3.0% (our prior estimate was +2-4%). We estimate that the overall industry will finish approximately +1.5-2.5% (our prior estimate was +2-3%). Please note that reported monthly results include hotels that are not in the weekly data set.

Due to the hurricane comparisons from the 2017 storms, we anticipate continued choppiness of the data in some of the most impacted major markets (Miami, Orlando, and Houston) and a generally difficult comp for these areas for the next several months.

#### RevPAR details:

• Luxury was the strongest chain scale. Upscale and Upper Midscale underperformed by 200 bps and 70 bps, respectively: Luxury RevPAR (+0.7%), Upper Upscale (+0.2%), Upscale (-1.3%), Upper Midscale

#### What's Inside

Weekly STR results and analysis

(+0.0%), Midscale (-1.0%), and Economy (-0.4%). Independent hotels (+0.6%) outperformed headline U.S. RevPAR.

- Within Upper Upscale & Luxury class hotels, Group was slightly softer than Transient: Transient segment (individual business and leisure travelers) RevPAR was -0.4% (vs. -0.5% last week) and Group segment RevPAR was -0.7% (vs. +1.9% last week).
- Chicago (+11.4%) was the strongest of the top five markets: Boston (-3.5%), LA (-3.7%), NYC (-5.9%), and DC (-0.5%).
- Other relevant markets:
  - San Francisco was strong yet again (Moscone Convention Center expansion and renovation completed): RevPAR was +11.9% vs. +14.0% last week.
  - Texas results were mixed (y/y hurricane comps in Houston): Dallas RevPAR was +4.0% (vs. 9.4% last week). Houston RevPAR was -10.1% (vs. -9.9% last week).
  - Hurricane-impacted markets in FL were down: Miami (-2.3% vs. -4.9% last week); Orlando (-4.4% vs. -0.5% last week).

The stocks: We continue to favor C-Corps over hotel REITs (we favored hotel REITs for the first half of 2018). In an environment of low RevPAR growth combined with gradually increasing wages/margin pressures, returns for hotel owners is a major headwind to EBITDA growth. Hotel stocks, but especially hotel REIT stocks, typically work best when there is a spark to RevPAR growth and at this moment we are not seeing such a spark like we did earlier in 2018. We are more favorable on other sectors at the moment, namely cruise lines.

#### The rating system effective as of Oct. 7, 2016:

#### **STRH Rating System for Equity Securities**

SunTrust Robinson Humphrey (STRH) rates individual equities using a three-tiered system. Each stock is rated relative to the broader market (generally the S&P 500) over the next 12-18 months (unless otherwise indicated).

**Buy (B)** – the stock's total return is expected to outperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

**Hold (H)** – the stock's total return is expected to perform in line with the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

**Sell (S)** – the stock's total return is expected to underperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Not Rated (NR) - STRH does not have an investment rating or opinion on the stock

**Coverage Suspended (CS)** – indicates that STRH's rating and/or target price have been temporarily suspended due to applicable regulations and/or STRH Management discretion. The previously published rating and target price should not be relied upon

STRH analysts have a price target on the stocks that they cover, unless otherwise indicated. The price target represents that analyst's expectation of where the stock will trade in the next 12-18 months (unless otherwise indicated). If an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of STRH Research Management not to assign a target price; likewise certain stocks that trade under \$5 may exhibit volatility whereby assigning a price target would be unhelpful to making an investment decision. As such, with Research Management's approval, an analyst may refrain from assigning a target to a sub-\$5 stock.
