

Lodging - US RevPAR +1.0% Y/Y Last Week; Hurricane Dorian Impact to Florida

Group RevPAR relatively strong (+6.2%) driven partly by San Francisco

What's Incremental To Our View

Overall U.S. RevPAR was +1.0% Y/Y for the week ending 8/31/2019, per STR, similar to the prior week's result of +1.2%. (2-year stacked RevPAR was +5.8% vs +3.3% in the prior week.) Independent hotels (about 1/3rd of the data set) were +1.0% y/y. Upper Upscale (+3.1%) was the strongest chain scale for branded hotels; Economy was the weakest at -1.0%. Upper Midscale (+0.1%) and Midscale (-0.4%) underperformed the industry average. Within Upper Upscale & Luxury class hotels, Group (+6.2% vs. -2.5% prior week) outperformed Transient (+1.1% vs. +2.0% prior week).

Last week presented varied results across the chain scales although we note that the pre-Labor Day week is generally a relatively lower occupancy period.

We believe a number of factors were at play last week that are notable in particular for the REITS:

- Most notable to us: Group RevPAR was quite strong at +6.2% vs. Transient of +1.1%. <u>San Francisco had an exceptional Group week</u> (Group RevPAR was +172.4%, largely occupancy driven). Given San Francisco's high overall room rates, we believe the market's strength lifted the national headline results.
- Conversely, impact from Hurricane Dorian was evident in the Florida results. Miami, Orlando, and Tampa noted double digit y/y occupancy declines by the end of the week (Miami occupancy was -38.6% on Saturday, Orlando was -41.9%, and Tampa was -14.7%). Anecdotal evidence (based on being in airports and in South Florida last weekend) suggests to us that many leisure/holiday travelers likely cancelled flights in light of Dorian's approach.
- We assume that the Florida markets (especially Miami and Orlando) will have weak RevPAR results in next week's data. We also assume mixed results for many coastal markets along the Eastern Seaboard given Dorian's potential impact to cities such as Charleston, SC. Inland markets may receive demand (generally a benefit to Midscale/Economy). Coastal markets (and in this case some higher rated markets) are likely to have weaker results among top 25 markets outside of Florida, we assume Norfolk/ Virginia Beach will have challenged results and perhaps Boston as well given the current Tropical Storm Watch in parts of coastal Massachusetts.

What's Inside

Weekly STR results and analysis

For the month of August, we estimate that full-service branded domestic hotels (the typical Hilton [HLT, Hold], Hyatt [H, Hold], or Marriott [MAR, Hold] hotel) will finish approximately flattish (our prior estimate was "approximately flat to -1%"). We estimate that the overall industry will finish approximately flat to -1%"). Please note that reported monthly results include hotels that are not in the weekly data set.

Last week's RevPAR details:

- Upper Upscale was the strongest chain scale: Upscale and Upper Midscale underperformed by 330 bps and 300 bps, respectively: Luxury RevPAR (+2.6%), Upper Upscale (+3.1%), Upscale (-0.2%), Upper Midscale (+0.1%), Midscale (-0.4%), and Economy (-1.0%). Independent hotels (+1.0%) performed in-line with headline U.S. RevPAR.
- Within Upper Upscale & Luxury class hotels, Group outperformed Transient: Transient segment (individual business and leisure travelers) RevPAR was +1.1% (vs. +2.0% last week) and Group segment RevPAR was +6.2% (vs. -2.5% last week).
- Chicago (+4.2%) was the strongest of the top five markets: Boston (-5.5%), Los Angeles (+3.3%), NYC (-3.5%), and D.C. (+0.7%).
- Other relevant markets:
 - San Francisco was very strong (Moscone Convention Center expansion and renovation completed): RevPAR was +35.2% vs. +3.4% last week.
 - Florida markets were down due to the Hurricane Dorian impact: Miami (-16.8% vs. -4.3% last week); Orlando (-24.1% vs. +18.0% last week).

The lodging stocks: We continue to favor C-Corps over hotel REITS (we favored hotel REITS for the first half of last year) and within C-Corps we prefer Buyrated WH. In an environment of low RevPAR growth combined with gradually increasing wages/margin pressures, we think returns for hotel owners is a major REIT stuce, ago. headwind to EBITDA growth. Hotel stocks, but especially hotel REIT stocks, typically work best when there is a spark to RevPAR growth and at this moment we are not seeing such sparks like we did at this time one year ago.

WH: Valuation and Risks

Our price target of \$68 for WH is based on a 13.0x multiple (in line with portfolio quality/RevPAR relative to peers) of our 2020 EBITDA estimate.

Downside risk: slowdown in development opportunities. La Quinta synergies below expectations. La Quinta integration takes longer than anticipated. Macro demand headwinds.

HLT: Valuation and Risks

We apply a blended multiple of 14.8x (10.5x for Owned/leased and 15.0x for Managed/franchised) to our 2020 adjusted EBITDA estimate to derive a 12-month price target of \$99. This multiple is towards the higher end of the historical range of 10x-16x.

Risks to our rating and price target:

Upside risks include: Higher than expected pipeline growth, material RevPAR growth (macroeconomic improvement beyond expectations), material market share gains. Downside risks include: Growth trajectory could disappoint. Pipeline growth could either slow down or projects scheduled for construction could be cancelled, which would diminish system growth for the firm and disappoint investors.

H: Valuation and Risks

Our price target of \$79 for H is derived by applying a 13.2x target EV/EBITDA multiple (a blended average of the industry multiples for each business segment) to our estimate for 2020 EBITDA. Our valuation model for Hyatt assumes an owned-hotel 2020 EBITDA multiple of 12.0x and a franchise/management fee EBITDA multiple of 14.0x.

Upside risk: transient and group trends outperform expectations.

Downside risk: ongoing misexecution and volatility.

MAR: Valuation and Risks

Our \$131 price target is based on a 14.8x blended multiple on our 2020E EBITDA. In the parts, we assign a 13.0x multiple of EBITDA to the Owned segment and 15.0x fees EBITDA (the fees EBITDA also includes credit card branding fees, a 10x multiple business) to the managed/franchised business. The multiple is towards the higher end of the historical range of 9-18x.

Risks to our rating and price target:

Upside Risks: Significant U.S macroeconomic improvement results in large recovery in transient corporate demand (and consequential >400 bps RevPAR improvement). Owned assets sell for premium prices relative to MAR expectations.

Downside Risks: 2020 could potentially be a recession year in the US. Geopolitical and policy risks negatively impact lodging demand.

The rating system effective as of Oct. 7, 2016:

STRH Rating System for Equity Securities

SunTrust Robinson Humphrey (STRH) rates individual equities using a three-tiered system. Each stock is rated relative to the broader market (generally the S&P 500) over the next 12-18 months (unless otherwise indicated).

Buy (B) – the stock's total return is expected to outperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Hold (H) – the stock's total return is expected to perform in line with the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Sell (S) – the stock's total return is expected to underperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Not Rated (NR) - STRH does not have an investment rating or opinion on the stock

Coverage Suspended (CS) – indicates that STRH's rating and/or target price have been temporarily suspended due to applicable regulations and/or STRH Management discretion. The previously published rating and target price should not be relied upon

STRH analysts have a price target on the stocks that they cover, unless otherwise indicated. The price target represents that analyst's expectation of where the stock will trade in the next 12-18 months (unless otherwise indicated). If an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of STRH Research

Management not to assign a target price; likewise certain stocks that trade under \$5 may exhibit volatility whereby assigning a price target would be unhelpful to making an investment decision. As such, with Research Management's approval, an analyst may refrain from assigning a target to a sub-\$5 stock.

Legend for Rating and Price Target History Charts:

B = Buy

H = Hold

S = Sell

D = Drop Coverage

CS = Coverage Suspended

NR = Not Rated

I = Initiate Coverage

T = Transfer Coverage

The prior rating system until Oct. 7, 2016:

3 designations based on total returns* within a 12-month period**

- · Buy total return ≥ 15% (10% for low-Beta securities)***
- · Reduce total return ≤ negative 10% (5% for low Beta securities)
- · Neutral total return is within the bounds above
- · NR NOT RATED, STRH does not provide equity research coverage
- · CS Coverage Suspended
