

Lodging: US RevPAR -0.8% Y/Y Last Week; Holiday shifts push and pull

Net of 2018/19 calendar shifts led to slightly negative RevPAR with Group -8.9%

What's Incremental To Our View

Overall U.S. RevPAR was -0.8% Y/Y for the week ending 9/28/2019, per STR, softer than the prior week's result of +7.0%. (2-year stacked RevPAR was +8.2% vs +4.8% in the prior week.) Independent hotels (about 1/3rd of the data set) were +0.6% y/y. Luxury (+0.6%) was the strongest chain scale for branded hotels; Upper Upscale was the weakest at -2.7%. Upper Midscale (-0.5%) and Midscale (-0.6%) slightly outperformed the industry average. Within Upper Upscale & Luxury class hotels, Group (-8.9% vs. +25.9% prior week) was softer than Transient (+2.4% vs. +5.3% prior week).

As we anticipated in last week's note, there were many puts and takes to last week's lodging performance given calendar shifts in 2018 and 2019. In the y/y comp, there was a material corporate demand recovery following the completion of the 2018 Jewish High Holidays (Group RevPAR was +27.2% for the week ending 9/29/18; US RevPAR was +9.1%). Similarly, the week ending 9/28/19 represented the last non-holiday week before the 2019 High Holidays (Rosh Hashanah commenced on Sunday night); we assume there was still strong corporate demand the week before the holiday. Net-net, RevPAR was slightly negative for the industry and Group was -8.9% (off of the tough y/y comp).

- The business-oriented chain scales had among the weakest results, with Upper Upscale and Upscale down ~ 2.5%.
- On top of the holiday calendar shifts impacting last week's results, we do not discount the underlying macro trends (weakening demand combined with supply growth).

We assume the remainder of the month will be a very tough comp given lower business travel (both Transient and Group) in light of the 2019 holiday calendar shift. We forecast weaker corporate travel for the rest of September and into much of the first two weeks of October (potentially some late week corporate travel recovery this Wednesday-Friday but a very tough Group comp for the next two weeks).

- **Forecasting daily or weekly RevPAR is very difficult given transient bookings is relatively last minute. We have conviction over the direction of impact but less so on the numerical degree of impact.**

As a rule of thumb when analyzing the weekly data, if Group results are abnormally strong or weak, which they were last week, there is a holiday shift going on.

What's Inside

Weekly STR results and analysis

For the month of September, we estimate that full-service branded domestic hotels (the typical Hilton [HLT, Hold], Hyatt [H, Hold], or Marriott [MAR, Hold] hotel) will finish slightly positive (unchanged from our prior estimate). We estimate that the overall industry will finish approximately flat to -1% (unchanged from our prior estimate). Please note that reported monthly results include hotels that are not in the weekly data set.

- Forecasting calendar shift RevPAR impact day-by-day is incredibly difficult; major RevPAR changes at the end of the quarter could materially impact 3Q in aggregate.

For 3Q, we estimate that full-service branded domestic hotels (the typical Hilton [HLT, Buy], Hyatt [H, Hold], or Marriott [MAR, Hold] hotel) will finish flattish (QTD results are ~ +1-2% but we still anticipate a very tough comp at the end of the month; no change from our prior estimate). We estimate that the overall industry will finish slightly positive (QTD results are +1.0%; no change from our prior estimate).

Last week's RevPAR details:

- **Luxury was the strongest chain scale:** Upscale and Upper Midscale underperformed by 310 bps and 110 bps, respectively: Luxury RevPAR (+0.6%), Upper Upscale (-2.7%), Upscale (-2.5%), Upper Midscale (-0.5%), Midscale (-0.6%), and Economy (-1.3%). Independent hotels (+0.6%) outperformed the headline U.S. RevPAR.
- **Within Upper Upscale & Luxury class hotels, Group underperformed Transient:** Transient segment (individual business and leisure travelers) RevPAR was +2.4% (vs. +5.3% last week) and Group segment RevPAR was -8.9% (vs. +25.9% last week).
- **NYC (+1.7%) was the strongest of the top five markets:** Boston (-12.0%), Chicago (+0.2%), Los Angeles (-2.6%), and D.C. (+0.9%).
- **Other relevant markets:**
 - **San Francisco was very negative (Moscone Convention Center expansion and renovation completed):** RevPAR was -21.3% vs. +19.8% last week.
 - **Florida markets were down:** Miami (-4.1% vs. +0.6% last week); Orlando (-24.2% vs. +9.1% last week).

The lodging stocks: We continue to favor C-Corps over hotel REITS (we favored hotel REITS for the first half of last year) and within C-Corps [we prefer Buy-rated WH](#). In an environment of low RevPAR growth combined with gradually increasing wages/margin pressures, we think [returns for hotel owners is a major headwind to EBITDA growth](#). We believe hotel stocks, but especially hotel REIT stocks, typically work best when there is a spark to RevPAR growth and at this moment we are not seeing such sparks like we did at this time one year ago.

WH: Valuation and Risks

Our price target of \$68 for WH is based on a 13.0x multiple (in line with portfolio quality/RevPAR relative to peers) of our 2020 EBITDA estimate.

Downside risk: slowdown in development opportunities. La Quinta synergies below expectations. La Quinta integration takes longer than anticipated. Macro demand headwinds.

HLT: Valuation and Risks

We apply a blended multiple of 14.8x (10.5x for Owned/leased and 15.0x for Managed/franchised) to our 2020 adjusted EBITDA estimate to derive a 12-month price target of \$99. This multiple is towards the higher end of the historical range of 10x-16x.

Risks to our rating and price target:

Upside risks include: Higher than expected pipeline growth, material RevPAR growth (macroeconomic improvement beyond expectations), material market share gains. Downside risks include: Growth trajectory could disappoint. Pipeline growth could either slow down or projects scheduled for construction could be cancelled, which would diminish system growth for the firm and disappoint investors.

MAR: Valuation and Risks

Our \$131 price target is based on a 14.8x blended multiple on our 2020E EBITDA. In the parts, we assign a 13.0x multiple of EBITDA to the Owned segment and 15.0x fees EBITDA (the fees EBITDA also includes credit card branding fees, a 10x multiple business) to the managed/franchised business. The multiple is towards the higher end of the historical range of 9-18x.

Risks to our rating and price target:

Upside Risks: Significant U.S macroeconomic improvement results in large recovery in transient corporate demand (and consequential >400 bps RevPAR improvement). Owned assets sell for premium prices relative to MAR expectations.

Downside Risks: 2020 could potentially be a recession year in the US. Geopolitical and policy risks negatively impact lodging demand.

H: Valuation and Risks

Our price target of \$79 for H is derived by applying a 13.2x target EV/EBITDA multiple (a blended average of the industry multiples for each business segment) to our estimate for 2020 EBITDA. Our valuation model for Hyatt assumes an owned-hotel 2020 EBITDA multiple of 12.0x and a franchise/management fee EBITDA multiple of 14.0x.

Upside risk: transient and group trends outperform expectations.

Downside risk: ongoing misexecution and volatility.

STRH Rating System for Equity Securities

SunTrust Robinson Humphrey (STRH) rates individual equities using a three-tiered system. Each stock is rated relative to the broader market (generally the S&P 500) over the next 12-18 months (unless otherwise indicated).

BUY (B) – the stock's total return is expected to outperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Hold (H) – the stock's total return is expected to perform in line with the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Sell (S) – the stock's total return is expected to underperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Not Rated (NR) – STRH does not have an investment rating or opinion on the stock

Coverage Suspended (CS) – indicates that STRH's rating and/or target price have been temporarily suspended due to applicable regulations and/or STRH Management discretion. The previously published rating and target price should not be relied upon.

STRH analysts have a price target on the stocks that they cover, unless otherwise indicated. The price target represents that analyst's expectation of where the stock will trade in the next 12-18 months (unless otherwise indicated). If an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of STRH Research Management not to assign a target price; likewise certain stocks that trade under \$5 may exhibit volatility whereby assigning a price target would

be unhelpful to making an investment decision. As such, with Research Management's approval, an analyst may refrain from assigning a target to a sub-\$5 stock.
