

# Lodging - US RevPAR +11.2% Y/Y Last Week; Big holiday calendar shifts

Group RevPAR +36.7% on one of the last big workweeks of the year

#### What's Incremental To Our View

Overall U.S. RevPAR was +11.2% Y/Y for the week ending 12/14/2019, per STR, stronger than the prior week's result of +1.4%. (2-year stacked RevPAR was +15.7% vs +2.0% in the prior week.) Independent hotels (about 1/3rd of the data set) were +15.5% y/y. Luxury (+19.6%) was the strongest chain scale for branded hotels; Economy was the weakest at +1.5%. Upscale (+8.8%) and Upper Midscale (+6.7%) also underperformed the industry average. Within Upper Upscale & Luxury class hotels, Group (+36.7% vs. +5.5% prior week) was stronger than Transient (+9.5% vs. +2.2% prior week).

We view the timing of Christmas and Chanukah this year pushing most of business travel to the first 2-3 weeks of December. Last week's data indicated that shift with very strong business travel. Group occupancy (a good proxy for business travel) was +28.6% y/y. Day of week demand was very strong all week with consistent RevPAR +9-13% all week.

The rest of the month's data will remain volatile with the week ending the 21st the last big workweek of December followed by two strong leisure weeks given Christmas, Chanukah, and New Year's.

As a rule of thumb when analyzing the weekly data, if Group results are abnormally strong or weak, which they were last week, there is a holiday shift going on.

For the month of December, we estimate that full-service branded domestic hotels (the typical Hilton [HLT, Hold], Hyatt [H, Hold], or Marriott [MAR, Hold] hotel) will finish +1-3%. We estimate that the overall industry will finish flattish to low-single-digit positive. Please note that reported monthly results include hotels that are not in the weekly data set.

• We emphasize that results for the remainder of the month will be volatile and difficult to predict with precision given the holidays. The holiday weeks will be impacted by any degree of winter weather issues and customer behavior about last-minute leisure spending which could be influenced by the existing macroeconomic and political issues both in the U.S. (e.g. impeachment) and abroad (Brexit impacting inbound U.K. demand, France strikes may push travelers to other markets such as the U.S., Hong Kong, etc.).

C. Patrick Scholes 212-319-3915 patrick.scholes@suntrust.com

Gregory J. Miller 212-303-4198 gregory.j.miller@suntrust.com

Kevin Robinson 617-345-6544 kevin.robinson@suntrust.com

#### What's Inside

Weekly STR results and analysis

• Some hotels are likely to be material beneficiaries of holiday demand (especially approaching high ADR New Year's Eve) -- we assume Luxury, some major market downtown Upper Upscale hotels (that appeal to leisure), and resorts will be y/y beneficiaries.

#### Last week's RevPAR details:

- Luxury was the strongest chain scale: Upscale and Upper Midscale underperformed by 1,080 bps and 1,290 bps, respectively: Luxury RevPAR (+19.6%), Upper Upscale (+13.4%), Upscale (+8.8%), Upper Midscale (+6.7%), Midscale (+2.7%), and Economy (+1.5%). Independent hotels (+15.5%) outperformed the headline U.S. RevPAR.
- Within Upper Upscale & Luxury class hotels, Group outperformed Transient: Transient segment (individual business and leisure travelers) RevPAR was +9.5% (vs. +2.2% last week) and Group segment RevPAR was +36.7% (vs. +5.5% last week).
- NYC was the strongest of the top five markets: Boston (+0.0%), Chicago (+14.5%), Los Angeles (+9.7%), NYC (+16.0%), and Washington, D.C. (-4.7%).
- Other relevant markets:
  - San Francisco was the best performing Top 25 market (Moscone Convention Center expected to have a very strong 4Q19 citywide calendar):
     RevPAR was +44.4% vs. -3.0% last week. Group RevPAR was +125.5%.
  - Florida markets were very strong: Miami (+10.0% vs. +1.2% last week); Orlando (+27.0% vs. +23.7% last week).

The lodging stocks: We continue to favor C-Corps over hotel REITS (we favored hotel REITS for the first half of last year) and within C-Corps we prefer Buyrated WH. In an environment of low RevPAR growth combined with gradually increasing wages/margin pressures, we think returns for hotel owners is a major headwind to EBITDA growth. We believe hotel stocks, but especially hotel REIT stocks; typically work best when there is a spark to RevPAR growth and at this moment we are not seeing such sparks like we did at this time one year ago.

\*\*\* Covered by Gregory J. Miller

Source: FactSet, STRH research

#### **WH: Valuation and Risks**

Our price target of \$68 for WH is based on a 13.0x multiple (in line with portfolio quality/RevPAR relative to peers) of our 2020 EBITDA estimate.

Downside risk: slowdown in development opportunities. La Quinta synergies below expectations. La Quinta integration takes longer than anticipated. Macro demand headwinds.

#### **HLT: Valuation and Risks**

We apply a blended multiple of 14.8x (10.5x for Owned/leased and 15.0x for Managed/franchised) to our 2020 adjusted EBITDA estimate to derive a 12-month price target of \$99. This multiple is towards the higher end of the historical range of 10x-16x.

Risks to our rating and price target:

Upside risks include: Higher than expected pipeline growth, material RevPAR growth (macroeconomic improvement beyond expectations), material market share gains. Downside risks include: Growth trajectory could disappoint. Pipeline growth could either slow down or projects scheduled for construction could be cancelled, which would diminish system growth for the firm and disappoint investors.

#### H: Valuation and Risks

Our price target of \$79 for H is derived by applying a 13.2x target EV/EBITDA multiple (a blended average of the industry multiples for each business segment) to our estimate for 2020 EBITDA. Our valuation model for Hyatt assumes an owned-hotel 2020 EBITDA multiple of 12.0x and a franchise/management fee EBITDA multiple of 14.0x.

Upside risk: transient and group trends outperform expectations.

Downside risk: ongoing misexecution and volatility.

#### **MAR: Valuation and Risks**

Our \$128 price target is based on a 14.8x blended multiple on our 2020E EBITDA. In the parts, we assign a 13.0x multiple of EBITDA to the Owned segment and 15.0x fees EBITDA (the fees EBITDA also includes credit card branding fees, a 10x multiple business) to the managed/franchised business. The multiple is towards the higher end of the historical range of 9-18x.

Risks to our rating and price target:

Upside Risks: Significant U.S macroeconomic improvement results in large recovery in transient corporate demand (and consequential >400 bps RevPAR improvement). Owned assets sell for premium prices relative to MAR expectations.

Downside Risks: 2020 could potentially be a recession year in the US. Geopolitical and policy risks negatively impact lodging demand.

## **STRH Rating System for Equity Securities**

SunTrust Robinson Humphrey (STRH) rates individual equities using a three-tiered system. Each stock is rated relative to the broader market (generally the S&P 500) over the next 12-18 months (unless otherwise indicated).

**Buy (B)** – the stock's total return is expected to outperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

**Hold (H)** – the stock's total return is expected to perform in line with the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

**Sell (S)** – the stock's total return is expected to underperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Not Rated (NR) – STRH does not have an investment rating or opinion on the stock

**Coverage Suspended (CS)** – indicates that STRH's rating and/or target price have been temporarily suspended due to applicable regulations and/or STRH Management discretion. The previously published rating and target price should not be relied upon.

STRH analysts have a price target on the stocks that they cover, unless otherwise indicated. The price target represents that analyst's expectation of where the stock will trade in the next 12-18 months (unless otherwise indicated). If an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of STRH Research Management not to assign a target price; likewise certain stocks that trade under \$5 may exhibit volatility whereby assigning a price target would be unhelpful to making an investment decision. As such, with Research Management's approval, an analyst may refrain from assigning a target to a sub-\$5 stock.
