

Lodging: US RevPAR -60.3% Y/Y Last Week; General sequential improvement w/w but mixed in AZ/TX

Rising virus cases in AZ/CA/FL/TX may put temporary ceiling on RevPAR recovery

What's Incremental To Our View

Overall U.S. RevPAR was -60.3% Y/Y for the week ending 6/20/2020, per STR, stronger than the prior week's result of -62.6%. (2-year stacked RevPAR was -60.0% vs. -61.2% in the prior week). Independent hotels (~1/3rd of the data set) were -53.2% y/y. Economy (-30.3%) was the relatively strongest chain scale for branded hotels; Luxury was the weakest at -79.3%. Upscale (-66.5%) underperformed the industry average; Upper Midscale (-54.4%) outperformed. Within Upper Upscale & Luxury class hotels, Group (-94.2% vs. -93.4% prior week) was softer than Transient (-65.4% vs. -70.5% prior week).

One week does not make a trend but we are closely watching the sequential performance in states with rising COVID-19 cases (for now we use the Top 25 proxy markets in Arizona, California, Florida, and Texas -- see below for details). While week/week sequential occupancies are rising in some markets, RevPAR percentage declines were worse vs. the week ending 6/13 in Dallas, Houston, and Phoenix. Given the very short booking window today especially on the leisure front, we assume some travelers are weighing discretionary travel decisions in part on virus news. It is easier to book or cancel a trip last minute if you live within a few hours drive of a hotel. We would view declining occupancies in these markets -- if this occurs -- to be a bad sign for markets in reopening phases.

- Once again, Phoenix had a day last week with positive ADR growth (just Saturday 6/20, at +0.9%). However, midweek ADR was down double digits and occupancy remains sharply negative (double digits all week). Our interpretation is Phoenix is benefiting from local/regional drive-to leisure given this time period is low season and resorts can be attractive with price-accommodating rates.
- Similar to the prior week's results, the Tampa Bay area was another outlier. Tampa-St. Pete had slightly negative ADR results over the weekend (average -4.5%) but occupancy was sharply negative around -27%.
- For both these markets and other states with rising COVID-19 cases, we will be very curious if relatively positive trends hold in the next several weeks.

What's Inside

Weekly STR results and analysis

Other important trends of note:

- "Location" RevPAR Y/Y change sequentially stronger. We still do not see a material corporate demand rebound: Urban (-78.7% vs. -79.9% in the prior week), Suburban (-57.9% vs. -59.4%), Interstate (-41.0% vs. -43.2%), and Resort (-50.1% vs. -56.2%).
 - Absolute occupancies: Urban: 32.4% vs. 30.7% in the prior week, Suburban: 45.7%% vs. 44.0%, Interstate 48.1% vs. 45.9%, and Resort: 44.8% vs. 40.1%.
- We remind investors: there are many hotels that suspended operations/closed and they are not included in the comparisons. Implications are that the headline statistics overstate the actual performance of the overall industry.

Please see our note on China & Italy later today for our additional analysis on last week's U.S. and international trends. We advise investors that the slow occupancy recovery in China is a leading indicator of what we assume will also be a slow occupancy recovery in the United States.

For the month of June, we estimate that full-service branded domestic hotels (the typical Hilton [HLT, Hold], Hyatt [H, Hold], or Marriott [MAR, Hold] hotel) will finish -65% to -75%. We estimate that the overall industry will finish approximately -56% to -66%. Please note that reported monthly results include hotels that are not in the weekly data set.

• For 2Q, we estimate that full-service branded domestic hotels will finish -79% to -84% and the overall industry will finish approximately -68% to -72%.

Compared to the prior week (ended 6/13), sequential RevPAR trends were stronger than last week's results.

- Headline RevPAR was -60.3% vs. the running 28 day average of -62.4%. By comparison per STR, the worst month of RevPAR since 1987 **pre-virus** was ~ -24% (Sept 2001).
- RevPAR for the weeks ended March 14th through June 13th, 2020 were -32.5/-69.5/-80.3/-81.6/-83.6/-79.4/-78.4/-76.8/-74.4/-73.6/-69.9/-62.1/-65.0/-62.6% respectively.
- Occupancy: absolute occupancy of 43.9% was sequentially **stronger**than the prior week of 41.7%. Occupancy y/y change of -41.8% is sequentially **stronger** the prior week of -43.4%.
- ADR: ADR y/y change of -31.7% was sequentially **stronger** than the prior week of -33.9%. (We do not consider sequential changes in absolute ADR material.)
- Occupancy vs. ADR trends: In the past several weeks we noted that occupancy y/y percentage declines were greater than ADR declines but that the two figures were narrowing. Our view has not changed. We believe this trend will continue to be the case as many higher-rated hotels remain closed and full-service corporate and group demand remains well below normal. We continue to assume a slow demand recovery for fly-to destinations (negative to Lodging REITS and higher-rated C-corp brands).
 - It is conceivable that fewer open hotels have contributed to the modest sequential weekly improvement in RevPAR trends.
- Open/closed hotels: Both conversations with our private hotel owner contacts and STR data suggest signs of hotels reopening. Per STR 9% of the hotel supply is closed (vs. 9% in the prior week.) We consider a sequentially stronger RevPAR trend (albeit on poor overall fundamentals) combined with hotel reopenings over the past several weeks to be a somewhat positive indicator although one week does not make a trend -- especially in today's lodging environment. Approximately 70 hotels were subtracted to the STR daily sample over the course of last week (out of a total property count of 32,292 starting with last Sunday 6/14) However, there were 32,383 hotels in the sample as of 6/19 so we still view more hotels opening than closing.
 - For a timing point of reference: We noticed the sample property count rising materially for the first time since the virus demand shock in early May (172 hotels added during the week starting 5/3, with a starting hotel count of 29,626 hotels).

Last week's RevPAR details:

- Economy was the relatively strongest chain scale: Upscale and Upper Midscale underperformed by 3,620 bps and 2,410 bps, respectively: Luxury RevPAR (-79.3%), Upper Upscale (-79.1%), Upscale (-66.5%), Upper Midscale (-54.4%), Midscale (-42.4%), and Economy (-30.3%). Independent hotels (-53.2%) outperformed the headline U.S. RevPAR.
- Within Upper Upscale & Luxury class hotels, Group underperformed Transient: Transient segment (individual business and leisure travelers) RevPAR was -65.4% (vs. -70.5% last week) and Group segment RevPAR was -94.2% (vs. -93.4% last week).
 - Absolute Group occupancy remains near zero and does not seem to be improving: 2.5% last week vs. 2.8% for the running 28 days.
- Los Angeles was the relatively strongest market of the top five markets: Boston (-86.4%), Chicago (-82.1%), Los Angeles (-68.4%), NYC (-77.3%), and Washington, D.C. (-81.2%).
- Other relevant markets:
 - San Francisco: RevPAR was -81.8% vs. -84.7% last week.
 - o COVID-19 "watch" markets (RevPAR):
 - Dallas: -67.1% vs. -65.3% last week. Absolute occupancy 40.8% vs. 39.4% last week.
 - Houston: -55.6% vs. -55.2% last week. Absolute occupancy 40.6% vs. 40.3% last week.
 - Phoenix: -36.3% vs. -33.8% last week. Absolute occupancy 48.3% vs. 47.6% last week.
 - Note: many hotels in these markets would in theory be in low/shoulder season by June. Weekly changes for resort locations (more impactful to Phoenix) may add noise to the sequential comparisons.

• Florida market RevPAR:

- Miami: (-62.6% vs. -68.1% last week). Some Miami-area hotels began reopening at the start of June (WSVN-TV). While not in the Miami stats, hotels in the Florida Keys began reopening on June 1 (Forbes). We note that in summer months, the Keys attract a larger base of drive-to Floridians.
- Orlando: (-77.5% vs. -78.4% last week). Once again Orlando is not seeing much of a sequential week/week improvement. We still expect Orlando results to improve as Florida opens up and especially as the theme parks resume operations. Note: for C-corps/REITS with material exposure near Walt Disney World, a number of on-property resorts are scheduled to open on June 22 (Travel Weekly). Companies include: HST, PK, RHP, RLJ, and WH. Other C-corps have large resorts in the area but relative exposure impact is lower (MAR, HLT, and H).

From observations of what is happening with RevPAR and re-openings in China, we suspect we may see a slower and longer recovery in the US, especially for business and group centric hotels, than what the more optimistic/bullish management teams and investors expect.

(Our ratings and price targets generally represent our recommendations and forecasts based on a 12 to 18 month outlook. We acknowledge that near term uncertainty and volatility could affect financial inputs to our targets, and the likely multiples the market may pay for those metrics.)

Analyst Certification

I, C. Patrick Scholes, hereby certify that the views expressed in this research report accurately reflect my personal views about the subject company(ies) and its (their) securities. I also certify that I have not been, am not, and will not be receiving direct or indirect compensation in exchange for expressing the specific recommendation(s) in this report.

I, Gregory J. Miller, hereby certify that the views expressed in this research report accurately reflect my personal views about the subject company(ies) and its (their) securities. I also certify that I have not been, am not, and will not be receiving direct or indirect compensation in exchange for expressing the specific recommendation(s) in this report.

Required Disclosures

Analyst compensation is based upon stock price performance, quality of analysis, communication skills, and the overall revenue and profitability of the firm, including investment banking revenue.

As a matter of policy and practice, the firm prohibits the offering of favorable research, a specific research rating or a specific target price as consideration or inducement for the receipt of business or compensation. In addition, associated persons preparing research reports are prohibited from owning securities in the subject companies.

Charts indicating changes in ratings can be found in recent notes and/or reports at our website or by contacting SunTrust Robinson Humphrey. Please see our disclosures page for more complete information at https://suntrust.bluematrix.com/sellside/Disclosures.action.

STRH Ratings System for Equity Securities

Dissemination of Research

SunTrust Robinson Humphrey (STRH) seeks to make all reasonable efforts to provide research reports simultaneously to all eligible clients. Reports are available as published in the restricted access area of our website to all eligible clients who have requested a password. Institutional investors, corporates, and members of the Press may also receive our research via third party vendors including: Thomson Reuters, Bloomberg, FactSet, and S&P Capital IQ. Additional distribution may be done by sales personnel via email, fax, or other electronic means, or regular mail.

For access to third party vendors or our Research website: https://suntrustlibrary.bluematrix.com/client/library.jsp.

Please email the Research Department at mailto:STRHEquityResearchDepartment@suntrust.com or contact your STRH sales representative.

STRH Rating System for Equity Securities

SunTrust Robinson Humphrey (STRH) rates individual equities using a three-tiered system. Each stock is rated relative to the broader market (generally the S&P 500) over the next 12-18 months (unless otherwise indicated).

Buy (B) – the stock's total return is expected to outperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Hold (H) – the stock's total return is expected to perform in line with the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Sell (S) – the stock's total return is expected to underperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Not Rated (NR) – STRH does not have an investment rating or opinion on the stock

Coverage Suspended (CS) – indicates that STRH's rating and/or target price have been temporarily suspended due to applicable regulations and/or STRH Management discretion. The previously published rating and target price should not be relied upon.

STRH analysts have a price target on the stocks that they cover, unless otherwise indicated. The price target represents that analyst's expectation of where the stock will trade in the next 12-18 months (unless otherwise indicated). If an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of STRH Research Management not to assign a target price; likewise certain stocks that trade under \$5 may exhibit volatility whereby assigning a price target would be unhelpful to making an investment decision. As such, with Research Management's approval, an analyst may refrain from assigning a target to a sub-\$5 stock.

Legend for Rating and Price Target History Charts:

B = Buy

H = Hold

S = Sell

D = Drop Coverage

CS = Coverage Suspended

NR = Not Rated
