Lodging: US RevPAR -48.4% Y/Y Last Week; Halloween shift helps a tad on the margin

Rising COVID cases not a clear-cut impact to last week's results

What's Incremental To Our View

Overall U.S. RevPAR was -48.4% Y/Y for the week ending 10/31/2020, per STR, softer than the prior week's result of -51.8%. (2-year stacked RevPAR was -48.3% vs. -51.9% in the prior week). Independent hotels (~ 1/3rd of the data set) were -41.0% y/y. Economy (-12.8%) was the relatively strongest chain scale for branded hotels; Luxury was the weakest at -73.0%. Upscale (-52.5%) underperformed the industry average; Upper Midscale (-37.1%) outperformed. Within Upper Upscale & Luxury class hotels, Group (-86.5% vs. -88.5% prior week) was softer than Transient (-58.8% vs. -58.1% prior week).

Last week's results were impacted by the shift of Halloween from Thursday last year to Saturday for 2020. In a normal year, a mid-week Halloween holiday negatively impacts business travel; similarly in 2020 we think the holiday negatively impacted weekend demand. We can support our views with Saturday RevPAR underperformance (-50.2%) and Thursday outperformance (-37.2%) combined with the slightly worse Transient results last week y/y vs. the Running 28 days (-58.8% vs. -56.7%). Group was flat vs. the Running 28 days -- we view some group demand less impacted by Halloween.

- We cannot determine if or to what extent rising COVID cases have impacted recent lodging results.

For the month of October, we estimate that full-service branded domestic hotels (the typical Hilton [HLT, Hold], Hyatt [H, Sell], or Marriott [MAR, Hold] hotel) will finish approximately -70% to -73% for Luxury/Upper Upscale full-service and -54% to -55% for Upscale full-service (our prior estimates were -67% to -73% for Luxury/Upper Upscale and -52% to -57% for Upscale full-service). We estimate that the overall industry will finish approximately -49% (our prior estimate was -48% to -52%). Please note that reported monthly results include hotels that are not in the weekly data set.

Compared to the prior week (ended 10/24), sequential RevPAR trends were sequentially mixed vs. last week's results.

- Headline RevPAR was -48.4% vs. the running 28 day average of -49.6%.
- RevPAR for the weeks ended March 14 through October 24, 2020 were -32.5/-69.5/-80.3/-81.6/-83.6/-79.4/-78.4/-76.8/-74.4/-73.6/

- **Occupancy:** absolute occupancy of 44.4% was sequentially **softer** than the prior week of 48.0%. Occupancy y/y change of -29.0% is sequentially **stronger** than the prior week of -31.7%.
- **ADR:** ADR y/y change of -27.4% was sequentially **stronger** than the prior week of -29.4%. (We do not consider sequential changes in absolute ADR material.)
- **"Location" RevPAR Y/Y change sequentially mixed vs. the prior week. We still do not see a material corporate demand rebound:** Urban (-71.6% vs. -74.5% in the prior week), Suburban (-41.6% vs. -47.3%), Interstate (-18.4% vs. -20.7%), and Resort (-51.7 vs. -50.3%).
 - **Absolute occupancies softer vs. the prior week:** Urban: 35.6% vs. 38.0% in the prior week, Suburban: 48.2% vs. 50.8%, Interstate: 48.7% vs. 52.5%, and Resort: 36.4% vs. 42.1%.
- **Open/closed hotels:** Per STR 3.0% of the hotel supply is closed (vs. 3.6% in the prior week.).
- Please note there are many hotels that suspended operations/closed and they are not included in the comparisons. Implications are that the headline statistics likely overstate the actual performance of the overall industry.

Last week's RevPAR details:

- **Economy was the relatively strongest chain scale:** Upscale and Upper Midscale underperformed by 3,970 bps and 2,430 bps, respectively: Luxury RevPAR (-73.0%), Upper Upscale (-72.1%), Upscale (-52.5%), Upper Midscale (-37.1%), Midscale (-23.7%), and Economy (-12.8%). Independent hotels (-41.0%) outperformed the headline U.S. RevPAR.
- **Within Upper Upscale & Luxury class hotels, Group underperformed Transient:** Transient segment (individual business and leisure travelers) RevPAR was -58.8% (vs. -58.1% last week) and Group segment RevPAR was -86.5% (vs. -88.5% last week).
 - Absolute Group occupancy remains limited: 4.4% last week vs. 4.9% for the running 28 days.
- **Los Angeles was the relatively strongest market of the top five markets:** Boston (-76.8%), Chicago (-74.2%), Los Angeles (-56.5%), NYC (-78.9%), and Washington, D.C. (-68.9%).
- **Other relevant markets:**
 - **San Francisco:** RevPAR was -76.7% vs. -78.6% last week.
 - **Florida market RevPAR:**
 - **Miami:** (-55.1% vs. -57.0% last week).
 - **Orlando:** (-69.0% vs. -71.4% last week).

The lodging stocks: We expect continued investor disappointment over the next several quarters. The primary driver of our negative stance is our belief in a slower than originally anticipated US RevPAR recovery, with urban business and group-centric hotels unfortunately being in the cross-hairs of the worst of the pain.

- **The good news is that leisure travel, especially drive-to leisure, has shown some green shoots over the past four months.** For the public companies, we reiterate the companies best relatively positioned here in our coverage universe for drive-to leisure are CHH (Hold) and WH (Buy) (we prefer WH over CHH due to a more attractive comparable valuation) and for the timeshare companies (Hold-rated BXG and Buy-rated HGV, VAC, and WYND). To be clear, like for the business and group-centric hotels, we think the next year will still be very challenging for these companies. *That said, in our view, they are relatively better positioned as to not be in the direct cross-hairs of the industry's greatest areas of pain.*

(Our ratings and price targets generally represent our recommendations and forecasts based on a 12 to 18 month outlook. We acknowledge that near term uncertainty and volatility could affect financial inputs to our targets, and the likely multiples the market may pay for those metrics.)

Truist Securities Rating System for Equity Securities

Truist Securities, Inc. ("Truist Securities") rates individual equities using a three-tiered system. Each stock is rated relative to the broader market (generally the S&P 500) over the next 12-18 months (unless otherwise indicated).

Buy (B) – the stock's total return is expected to outperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Hold (H) – the stock's total return is expected to perform in line with the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Sell (S) – the stock's total return is expected to underperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Not Rated (NR) – Truist Securities does not have an investment rating or opinion on the stock

Coverage Suspended (CS) – indicates that Truist Securities' rating and/or target price have been temporarily suspended due to applicable regulations and/or Truist Securities Management discretion. The previously published rating and target price should not be relied upon.

Truist Securities analysts have a price target on the stocks that they cover, unless otherwise indicated. The price target represents that analyst's expectation of where the stock will trade in the next 12-18 months (unless otherwise indicated). If an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Truist Securities Research Management not to assign a target price; likewise certain stocks that trade under \$5 may exhibit volatility whereby assigning a price target would be unhelpful to making an investment decision. As such, with Research Management's approval, an analyst may refrain from assigning a target to a sub-\$5 stock.
