Lodging: US RevPAR +62.0% Y/Y Last Week; 2yr -14.8% vs. Prior +10.1%.

Many moving parts w/ holidays/canes, but net-net 2year falls to pre-7/4 levels

What's Incremental To Our View

Overall U.S. RevPAR was +62.0% y/y for the week ending 9/11/2021, per STR, in-line with the prior week's result of +62.2%. Last week's RevPAR was up against a -48.1% comparable result in 2020 vs. -32.8% in the prior week's 2-year run-rate. On a 2-year run-rate, RevPAR was -14.8% vs. +10.1% in the prior week's 2-year run-rate.

While day-by-day analysis is very complicated due to Labor Day, Rosh Hashanah (Sept 6-8 this year, Sept 19-21 last year), and Hurricane Ida recovery, we note the following:

- The overall 2-year result of -14.8% was similar to results seen in June before the RevPAR acceleration seen around July 4th.
- Sunday night, the night before Labor Day, was extremely strong with the 2-year RevPAR of +50.8%. On the other hand, Monday and Tuesday nights were down approx. 42% vs. 2019; *clearly a volatile week with various holidays, weather, etc.*
- ADR continues to hold in there, especially for the Transient segment (leisure travel + individual business travel) as it was +4.1% vs. 2019.
- New Orleans, a top 25 market, likely had increased demand due to hurricane cleanup efforts, as RevPAR was +6.9% vs. 2019.

Major RevPAR statistics presented below:

- Luxury RevPAR: +132.1% y/y and -27.4% over 2 years
- Upper Upscale RevPAR: +115.4% y/y and -39.3% over 2 years;
- Upscale RevPAR: +67.1% y/y and -26.2% over 2 years;
- Upper Midscale RevPAR: +54.9% y/y and -9.0% over 2 years;
- Midscale RevPAR: +43.9% y/y and +6.7% over 2 years;
- Economy RevPAR: +32.7% y/y and +16.2% over 2 years;
- Independent hotels (~ 1/3rd of the data set) RevPAR: +50.2% y/y and -1.8% over 2 years; and
- Within Upper Upscale & Luxury class hotels:
 - Group: +242.2% y/y vs. +201.3% prior week; over 2 years: -56.9% vs -31.3% prior week.
 - Transient: +74.3% y/y vs. +76.3% prior week; over 2 years: -13.6% vs +6.4% prior week.

What's Inside

Weekly STR results and analysis

Last week's RevPAR details and sequential trends:

- Headline RevPAR was +62.0% y/y vs. the running 28-day average of +66.9% y/y.
- **Occupancy:** absolute occupancy was 60.0% y/y vs. the running 28-day average of 61.5% y/y.
- **Open/closed hotels:** Per STR, 1.0% of the hotel supply was closed (vs. 1.0% last week).
 - Please note there are many hotels that suspended operations/closed and they are not included in the comparisons. Implications are that the headline statistics likely overstate the actual performance of the overall industry.
- **Absolute Group occupancy remains light** and driven in our view partly from summer leisure group such as wedding demand: 12.6% last week vs. 11.9% for the running 28 days.

As far as stocks, we reiterate our view the companies relatively best positioned here in our coverage universe are the drive-to leisure-centric C-Corps CHH, WH, and RLJ for the value-play business traveler in the early corporate demand recovery, and the timeshare companies, HGV, VAC, and TNL (formerly WYND). WH, RLJ, HGV, VAC, and TNL are the only names we believe we can still get material upside based on our 2023 estimates, hence our Buy ratings. CHH is rated Hold.

While the broader economy may have a U-shaped recovery, we believe hotel operating performance will take substantially longer to recover and be much choppier and vary by segmentation and geography. Additionally, we believe work from home will have a short-to-medium impact on hotel demand, though the longer-term impact is still unknown. While some travel industry leaders, news reporters, and businesspeople have predicted that **35-50% of business travel will be permanently lost**, our view is that it will be far less than 35-50% though it will not be zero either (Hospitality Net).

Truist Securities Rating System for Equity Securities

Truist Securities, Inc. ("Truist Securities") rates individual equities using a three-tiered system. Each stock is rated relative to the broader market (generally the S&P 500) over the next 12-18 months (unless otherwise indicated).

Buy (B) – the stock's total return is expected to outperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Hold (H) – the stock's total return is expected to perform in line with the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Sell (S) – the stock's total return is expected to underperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Not Rated (NR) – Truist Securities does not have an investment rating or opinion on the stock

Coverage Suspended (CS) – indicates that Truist Securities' rating and/or target price have been temporarily suspended due to applicable regulations and/or Truist Securities Management discretion. The previously published rating and target price should not be relied upon.

Truist Securities analysts have a price target on the stocks that they cover, unless otherwise indicated. The price target represents that analyst's expectation of where the stock will trade in the next 12-18 months (unless otherwise indicated). If an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Truist Securities Research Management not to assign a target price; likewise certain stocks that trade under \$5 may exhibit volatility whereby assigning a price target would be unhelpful to making an investment decision. As such, with Research Management's approval, an analyst may refrain from assigning a target to a sub-\$5 stock.
