

Lodging

Lodging: US RevPAR +126.7% Y/Y Last Week; 2yr -2.7% vs. Prior -9.2%; Chanukah calendar shift benefit

Unclear Omicron impact in last week's results but impact more definitive already for 1Q22 groups

What's Incremental To Our View

Overall U.S. RevPAR was +126.7% y/y for the week ending 12/11/2021, per STR, stronger than the prior week's result of +117.1%. Last week's RevPAR was up against a -57.3% comparable result in 2020 vs. -58.4% in the prior week's 2-year run-rate. On a 2-year run-rate, RevPAR was -2.7% vs. -9.2% in the prior week's 2-year run-rate.

The calendar shift of Chanukah (started Sunday 11/28/21 vs. prior years Thursday 12/10/20 and Sunday 12/22/19) resulted in a somewhat easier y/y comp. We suspect there was Omicron impact in last week's results but impossible to tell the degree due to the holiday shift.

While the Omicron impact to last week's results is difficult to quantify, we are of the belief that the variant will negatively impact corporate, group, and international travel in future weeks. The most recent evidence is a major healthcare conference for San Francisco shifting to virtual in January (CNBC). Industry chatter several months ago was this live conference was to be seen as ushering in the "return to normalcy" for large group events (though chatter today around the cancellation is that attendees were not thrilled about going to San Francisco anyway given recent crime headlines). We would strongly assume some other 1Q22 events will also shift to virtual and/or have lower live attendance due to the variant. Public company executives at our conference last week did not point to any major U.S. cancellations for 1Q22 but anticipated a challenged 1H22 for business travel -- the virus situation is obviously fluid and expectations were not particularly bullish. Events that maintain live attendance in early 1Q22 may risk considerable media blowback if there is an outbreak and corporations are also receiving negative media coverage for recent outbreaks at live offices including in NYC

- We encourage investors keep attentive to attendance stats at two upcoming January events.
 - Consumer Electronics Show in Las Vegas (virtual in 2021)
 - The hospitality industry's own ALIS Conference in Los Angeles (live event last summer, pushed from traditional January spot, but attendance was reportedly very light) (Reuters; CoStar).
- We also remind readers that official reported attendance statistics at conventions/trade shows/exhibitions and conferences may not reflect noshows, a topic we analyzed in our deep dive on large business events and was proven through bookings data from STR, Kalibri Labs, and other hotel data vendors. Official promoted statistics on robust attendance (arguably fuzzy math) is also a factor for live investor and financial services

What's Inside

Weekly STR results and analysis

conferences in 2021, especially when we read about live attendance being far above 2019 levels with the same number of companies in attendance.

One other aside from last week's STR results worth discussing is 2021 absolute occupancy trends and comparisons vs. 2019.

- NYC maintained occupancy north of 70% all week (mid 80s starting Wednesday night). Occupancy was down 15-21% vs. 2019 from Monday-Wednesday and down 6% on Friday/Saturday. Comparatively, ADR was down double digits vs. 2019 from Monday-Wednesday and up double digits on Friday/Saturday.
- For domestic business travel, we note that early workweek occupancy was generally in the 50s-60s%, down double-digits percent to 2019 for Upscale, Upper Upscale, and Luxury chain scales. ADR trends were mixed on the weekdays but up double digits vs. 2019 on the weekends.

Major RevPAR statistics presented below:

- Luxury RevPAR: +324.4% y/y and -7.6% over 2 years
- Upper Upscale RevPAR: +279.2% y/y and -17.5% over 2 years;
- Upscale RevPAR: +129.4% y/y and -12.5% over 2 years;
- Upper Midscale RevPAR: +87.2% y/y and +1.9% over 2 years;
- Midscale RevPAR: +57.5% y/y and +14.2% over 2 years;
- Economy RevPAR: +37.2% y/y and +20.7% over 2 years;
- Independent hotels (~ 1/3rd of the data set) RevPAR: +120.1% y/y and +5.6% over 2 years; and
- Within Upper Upscale & Luxury class hotels:
 - Group: +606.8% y/y vs. +483.3% prior week; over 2 years: -21.1% vs -38.1% prior week.
 - Transient: +213.7% y/y vs. +205.8% prior week; over 2 years: -5.5% vs -10.2% prior week.

Last week's RevPAR details and sequential trends:

- Headline RevPAR was +126.7% y/y vs. the running 28-day average of +113.1% y/y.
- Occupancy: Absolute occupancy was 57.4% y/y vs. the running 28-day average of 56.2% y/y.
- Open/closed hotels: Per STR, 0.6% of the hotel supply was closed (vs. 0.7% last week).
 - Please note there are many hotels that suspended operations/closed and they are not included in the comparisons. Implications are that the headline statistics likely overstate the actual performance of the overall industry.
- Absolute Group occupancy remains relatively light and driven in our view partly from leisure group such as wedding demand and moderate attendance from late year business events: 16.1% last week vs. 13.0% for the running 28 days.

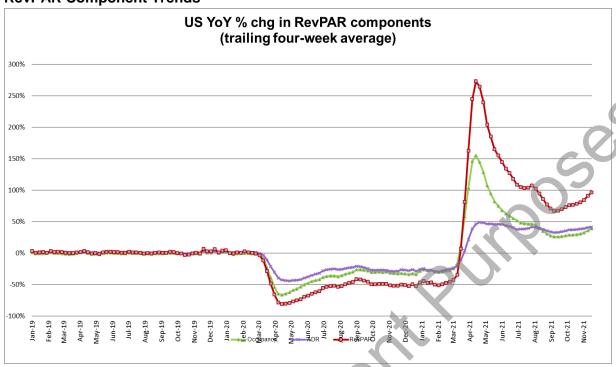

As far as stocks, we reiterate our view the companies relatively best positioned here in our coverage universe are the drive-to leisure-centric C-Corps CHH, WH, and RLJ for the value-play business traveler in the early corporate demand recovery, and the timeshare companies, HGV, VAC, and TNL (formerly WYND). WH, RLJ, HGV, VAC, and TNL are the only names we believe we can still get material upside based on our 2023 estimates, hence our Buy ratings. CHH is rated Hold.

While the broader economy may have a U-shaped recovery, we believe hotel operating performance will take substantially longer to recover and be much choppier and vary by segmentation and geography. Additionally, we believe work from home will have a short-to-medium impact on hotel demand, though the longer-term impact is still unknown. While some travel industry leaders, news reporters, and businesspeople have predicted that 35-50% of business travel will be permanently lost, our view is that it will be far less than 35-50% though it will not be zero either (Hospitality Net).

Truist Securities Ratings System for Equity Securities

Dissemination of Research

Truist Securities, Inc. ("Truist Securities") seeks to make all reasonable efforts to provide research reports simultaneously to all eligible clients. Reports are available as published in the restricted access area of our website to all eligible clients who have requested a password. Institutional investors, corporates, and members of the Press may also receive our research via third party vendors including: Thomson Reuters, Bloomberg, FactSet, and S&P Capital IQ. Additional distribution may be done by sales personnel via email, fax, or other electronic means, or regular mail.

For access to third party vendors or our Research website: https://truistresearch.bluematrix.com/client/library.jsp

Please email the Research Department at EquityResearchDepartment@research.truist.com or contact your Truist Securities sales representative.

Truist Securities Rating System for Equity Securities

Truist Securities, Inc. ("Truist Securities") rates individual equities using a three-tiered system. Each stock is rated relative to the broader market (generally the S&P 500) over the next 12-18 months (unless otherwise indicated).

Buy (B) – the stock's total return is expected to outperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Hold (H) – the stock's total return is expected to perform in line with the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Sell (S) – the stock's total return is expected to underperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Not Rated (NR) - Truist Securities does not have an investment rating or opinion on the stock

Coverage Suspended (CS) – indicates that Truist Securities' rating and/or target price have been temporarily suspended due to applicable regulations and/or Truist Securities Management discretion. The previously published rating and target price should not be relied upon.

Truist Securities analysts have a price target on the stocks that they cover, unless otherwise indicated. The price target represents that analyst's expectation of where the stock will trade in the next 12-18 months (unless otherwise indicated). If an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Truist Securities Research Management not to assign a target price; likewise certain stocks that trade under \$5 may exhibit volatility whereby assigning a price target would be unhelpful to making an investment decision. As such, with Research Management's approval, an analyst may refrain from assigning a target to a sub-\$5 stock.

Legend for Rating and Price Target History Charts:

B = Buy

H = Hold

S = Sell

D = Drop Coverage

CS = Coverage Suspended

NR = Not Rated

I = Initiate Coverage
