As far as specific stocks/sub-sectors, we continue to be most favorable on the leisure-centric companies, namely WH (Buy) and the Vacation Ownership companies, HGV (Buy), VAC (Buy), BVH (Buy), and TNL (Buy). Common characteristics besides high leisure exposure include attractive valuations, recovered balance sheets, and return of capital to shareholders via repurchases and/or dividends. To the list of favorites, we include Hyatt (H, Buy) given its increasing exposure to leisure via its acquisition of Apple Leisure Group and its progress on selling owned assets and shifting to a more asset-lite company. We also continue to favor RLJ (RLJ, Buy, Miller) driven partly by our continued view of its relative valuation discount and operational enhancements/hotel repositionings supporting incremental EBITDA growth. **Lastly, we are encouraged by the progress we are seeing in higher-end corporate and group travel, which was reflected in our recent (6/1) upgrade of PK (Buy) to Buy from Hold.**

Truist Securities Rating System for Equity Securities

Truist Securities, Inc. ("Truist Securities") rates individual equities using a three-tiered system. Each stock is rated relative to the broader market (generally the S&P 500) over the next 12-18 months (unless otherwise indicated).

Buy (B) – the stock's total return is expected to outperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Hold (H) – the stock's total return is expected to perform in line with the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Sell (S) – the stock's total return is expected to underperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Not Rated (NR) – Truist Securities does not have an investment rating or opinion on the stock

Coverage Suspended (CS) – indicates that Truist Securities' rating and/or target price have been temporarily suspended due to applicable regulations and/or Truist Securities Management discretion. The previously published rating and target price should not be relied upon.

Truist Securities analysts have a price target on the stocks that they cover, unless otherwise indicated. The price target represents that analyst's expectation of where the stock will trade in the next 12-18 months (unless otherwise indicated). If an analyst believes

that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Truist Securities Research Management not to assign a target price; likewise certain stocks that trade under \$5 may exhibit volatility whereby assigning a price target would be unhelpful to making an investment decision. As such, with Research Management's approval, an analyst may refrain from assigning a target to a sub-\$5 stock.
