Reasons for this report

✓ Our analysis of the most recent weekly US lodging results

Lodging: US RevPAR +30.6% Y/Y Last Week. +12.9% vs. 2019. First look at fall business travel

Overall U.S. RevPAR was +30.6% y/y for the week ending 9/17/2022, per STR, stronger than the prior week's result of +14.9%. Last week's RevPAR was up against a +75.8% comparable result in 2021 vs. +62.0% in the prior week. *On a 3-year run-rate* (vs. 2019), RevPAR was +12.9% vs. -1.8% in the prior week's 3-year run-rate.

Versus 2021: easy comp due to Yom Kippur in the prior year. Versus 2019: encouraging recovery of occupancy with several major business-focused markets into the 80s/90s % in the midweek. ADR growth is mixed given operating/labor cost growth.

As August and early September are leisure travel heavy periods, below is our take on the first material business travel week, albeit one that had easy y/y holiday comps, since June:

- 2022:
 - Very decent midweek occupancy in Upper Upscale, Upscale, Urban, and Top 25 markets pointing to business travel recovery, perhaps more Group than Transient given what we see in the segmentation results (below). Overall, it is promising to see Top 25 market occupancies in the 80s/90s even if still shy of 2019 levels in major corporate and convention markets, such as Boston, Chicago, NYC, SF, and DC. ADR feels a bit more mixed to us, especially when comparing against leisure August/early September (last week results versus the running 28 days). We would like to see the recovery of the higher-rated business traveler and generally high midweek occupancy leading to compression and therefore overall higher room rates. We need more weeks of clean comp data to more properly opine on the trends.
- **Versus 2021 (y/y):** Rosh Hashanah and Yom Kippur holiday shifts evident in midweek as Monday-Thursday occupancy +17% versus the week +11%.
- Versus 2019: Maybe a bit of an easy comp post-Labor Day shift and Hurricane Dorian. We see continued ADR relative underperformance in Upper Upscale/ Upscale and some Top 25 markets as somewhat less encouraging considering labor cost growth. However, as we like to say "one week does not make a trend".

Major RevPAR statistics presented below:

- Luxury RevPAR: +56.4% y/y and +11.7% over 3 years;
- Upper Upscale RevPAR: +65.1% y/y and +3.3% over 3 years;
- Upscale RevPAR: +35.7% y/y and +5.6% over 3 years;
- Upper Midscale RevPAR: +18.0% y/y and +12.4% over 3 years;
- Midscale RevPAR: +8.5% y/y and +16.3% over 3 years;
- Economy RevPAR: +4.3% y/y and +18.5% over 3 years;
- Independent hotels (~ 1/3rd of the data set) RevPAR: +24.0% y/y and +20.2% over 3 years; and
- Within Upper Upscale & Luxury class hotels:
 - o Group: +97.6% y/y vs. +49.2% prior week; over 3 years: +2.6% vs -34.5% prior
 - Transient: +35.7% y/y vs. +19.8% prior week; over 3 years: +14.0% vs +6.1% prior week.

Last week's RevPAR details and sequential trends:

- Headline RevPAR was +30.6% y/y vs. the running 28-day average of +19.5% y/y.
- Occupancy: Absolute occupancy was 69.6% y/y vs. 64.7% for the running 28-day average.
- Absolute Group occupancy: 26.4% last week vs. 18.7% for the running 28 days.

We summarize our view on the lodging sector at the moment as one of "relative optimism," a view markedly more favorable than the bear case of "relative pessimism". Of the lodging stocks our favorite name is Hyatt (H, Buy) which we see in the "sweet spot" of both the group recovery and strength in international markets, most notably the Caribbean. Hyatt generates approx. 30% of earnings from the group segment and 30% from its Caribbean-centric Apple Leisure Group segment. To this we note an EV/EBITDA valuation multiple approx. 350 bps. below that of HLT (Hold) and MAR (Hold). Additionally, we raised our rating on RHP (Buy) to Buy from Hold on 9/7/22 and raised our price target to \$103 from \$95. At 75% of its business coming from groups/conventions, RHP has the greatest exposure to this customer segment. For the lodging sector as a whole, we see the biggest potential drivers of earnings upside coming from corporate group business and associated outside of room spend (aka "Total RevPAR") and secondarily from the recovery in international markets.

Required Disclosures

Analyst compensation is based upon stock price performance, quality of analysis, communication skills, and the overall revenue and profitability of the firm, including investment banking revenue.

As a matter of policy and practice, the firm prohibits the offering of favorable research, a specific research rating or a specific target price as consideration or inducement for the receipt of business or compensation. In addition, associated persons preparing research reports are prohibited from owning securities in the subject companies.

Charts indicating changes in ratings can be found in recent notes and/or reports at our website or by contacting Truist Securities. Please see our disclosures page for more complete information at https://truist.bluematrix.com/sellside/Disclosures.action

Truist Securities Ratings System for Equity Securities

Dissemination of Research

Truist Securities, Inc. ("Truist Securities") seeks to make all reasonable efforts to provide research reports simultaneously to all eligible clients. Reports are available as published in the restricted access area of our website to all eligible clients who have requested a password. Institutional investors, corporates, and members of the Press may also receive our research via third party vendors including: Thomson Reuters, Bloomberg, FactSet, and S&P Capital IQ. Additional distribution may be done by sales personnel via email, fax, or other electronic means, or regular mail.

For access to third party vendors or our Research website: https://truistresearch.bluematrix.com/client/library.jsp

Please email the Research Department at EquityResearchDepartment@truist.com or contact your Truist Securities sales representative.

Truist Securities Rating System for Equity Securities

Truist Securities, Inc. ("Truist Securities") rates individual equities using a three-tiered system. Each stock is rated relative to the broader market (generally the S&P 500) over the next 12-18 months (unless otherwise indicated).

Buy (B) – the stock's total return is expected to outperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Hold (H) – the stock's total return is expected to perform in line with the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Sell (S) – the stock's total return is expected to underperform the S&P 500 or relevant benchmark over the next 12-18 months (unless otherwise indicated)

Not Rated (NR) - Truist Securities does not have an investment rating or opinion on the stock

Coverage Suspended (CS) – indicates that Truist Securities' rating and/or target price have been temporarily suspended due to applicable regulations and/or Truist Securities Management discretion. The previously published rating and target price should not be relied upon.

Truist Securities analysts have a price target on the stocks that they cover, unless otherwise indicated. The price target represents that analyst's expectation of where the stock will trade in the next 12-18 months (unless otherwise indicated). If an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Truist Securities Research Management not to assign a target price; likewise certain stocks that trade under \$5 may exhibit volatility whereby assigning a price target would be unhelpful to making an investment decision. As such, with Research Management's approval, an analyst may refrain from assigning a target to a sub-\$5 stock.

Legend for Rating and Price Target History Charts:

B = Buy

H = Hold

S = Sell

D = Drop Coverage

CS = Coverage Suspended

NR = Not Rated
