

DEVELOPING A SUSTAINABILITY PLAN

Organizations are increasingly facing pressure to set a clear, defined sustainability plan. Whether it's internal or external stakeholders, a push to reduce emissions, or an eye for decreased energy costs, establishing sustainability initiatives can be complex and confusing without the right guidance. Enter, APPI Energy. Our team takes a holistic approach, assessing your overall energy goals and needs before identifying the next steps in your organization's path to sustainability.

WHAT'S DRIVING YOUR ORGANIZATION'S SUSTAINABILITY GOALS?

Internal stakeholders (board members, leadership, marketing/PR, employees, etc.)

External stakeholders (current and prospective buyers/clients, local community, the general public, etc.)

Supply chain partners (both up and downstream)

Environmental stewardship

Cost savings

A path to reduced emissions

A TRUSTED SOURCE WITH TAILORED SOLUTIONS

Our team works as a true extension of your team, going to task on assessing your energy needs and sustainability goals, finding the right vendors, facilitating the project(s), and guiding you every step of the way. We are product and technology agnostic, meaning we put your needs first and foremost.

ENERGY SOLUTIONS

- ✓ Emissions benchmarking / carbon accounting
- ✓ Efficiency and conservation (right sizing load with LEDs, controls, modernizing HVAC equipment/boilers)
- ✓ Onsite generation (solar in particular with new incentives available in the Inflation Reduction Act)
- ✓ Fleet electrification
- ✓ Procuring renewable energy for remainder of your load (RECs – solar/wind), community solar

IN THEIR WORDS

“

We came to APPI Energy interested in their sustainability solution technologies, specifically their LED lighting retrofit program. They listened to what we needed for our facility and our finances. They were able to secure us a complete lighting retrofit with no upfront costs and easy on-bill funding. Within the first year we saved roughly 63% on energy costs! This project also increases the safety and happiness of our employees, which ultimately increases productivity. They made the process seamless and we are thrilled with the outcome.

LUX GLOBAL LABEL

NEXT STEPS

Connect with APPI Energy today for a complimentary assessment. This exploratory conversation comes at no cost or obligation to you. We'll learn about your organization's operations, energy consumption, costs, demand, objectives and opportunities before presenting a detailed path forward.
