

Judges Needed

Constructed Project Award

The Excellence in Constructed Project award recognizes a water resource project with significant contribution to the dam community and/or to society that met the challenge of the nation's aging infrastructure in an era of limited financial resource and increasing environmental awareness. This prestigious award is presented to one worthy team every year at the USSD Annual Conference.

We are looking for seasoned professionals to help judge constructed project submissions for design innovation, efficiency, challenge mitigation projects provide the best use of resources for sustainable water resources management.

Typically, each project submission which includes a project writeup and post construction photos, is scored by a diverse panel of judges representing the fields listed below:

- Academia
- Owner
- Regulator
- Contractor
- Consultant

Judges Needed **Public Safety, Security, & Emergency Management Award**

Dams are identified in the National Infrastructure Protection Plan as a Critical Infrastructure. Organizations, projects, and individuals have taken the call to lead the Dam industry in establishing public safety and security standards. The physical, personnel, information, and cyber components of a public safety and security practice are challenging enough for traditional buildings and structures, but their application to dams presents a unique ability that requires professional artistry that shouldn't go without recognition.

It is for this purpose that this recognition was established by the Committee on Public Safety, Security and Emergency Management for Dams. If you have an interest in public safety, security and emergency management for dams and are eager to get involved, please reach out to Sharon Roach and to express interest in selecting this year's Public Safety, Security and Emergency Management nominee.
