

Education and Training Committee– Call for Members

As part of USSD’s strategic plan, a new education and training committee is being formed to assist in fulfilling the objectives of the plan under the Education and Professional Development Domain.

- Identify advancements in dams and levees and needs for training;
- Develop and deliver industry relevant education and training;
- Create a structured curriculum for dam and levee professionals.

Committee Purpose and Responsibilities

Identify training topics and oversee facilitation of workshops, seminars, and webinars outside of conference

Determine the educational needs of the membership (as identified through needs assessments and surveys) and identify or develop resources to address those needs

Work with USSD staff to coordinate training logistics

Serve as a resource for USSD leadership on educational programming development and delivery; SME recruitment.

Vet the quality of the training proposals to ensure excellence in content and delivery

The Education and Training Committee will be an integral part of USSD’s enhanced focus on identifying education and training topics that will provide opportunities to achieve the level of knowledge and skill necessary to serve the dam and levee industry and profession.

The committee once formed, will be charged with creating their committee charter.
