May 5, 2022

In the last year we have had a couple of public agencies request credentials for two upcoming separate cases in the state that required my expertise. I found the dividing factor in selecting my firm over other in the same field was the CFLC credential as well as the MCFLC credential. Many experts advertise their skills and experience but without any independent 3rd party organization that credentials them as to the level of expertise and experience they have. I think this made a big difference. There is no other credentialing nationally for expert witnesses other than this and as a FEWA member, I am really happy the Board had the insight to develop this criteria and qualification verification. I highly recommend all members strive to meet the qualifications and add this to your CV.

Sincerely,

Robert A. Tucknott, MCFLC

ABOUT ROBERT

Robert (Bob) Tucknott is an electrical expert witness and is part of FEWA’s Northwest Region. His specialties include, Electrical Fire, defects, injury and anything electrical that is in litigation. During his many depositions and trials, Bob has made complicated issues easy to understand and comprehend by juries.
