FOR IMMEDIATE RELEASE

Hirschbach Motor Lines to Acquire Lessors, Inc.

DUBUQUE, Iowa (June 23, 2021) – Hirschbach Motor Lines announced an expansion through the acquisition of Eagan, MN based company Lessors, Inc. (represented by Transport Capital Partners).

Hirschbach, a Refrigerated/temperature control specialist, has a current driver/operator base of 2,200 and is expected to exceed 2,400 after the integration with Lessors.

“We’re very excited to welcome the Lessor drivers along with their mechanics and office staff to the Hirschbach family,” said Brad Pinchuk, CEO/Owner of Hirschbach. “It’s an organization I’ve admired for decades.”

“Lessors has a reputation of providing a high level of service to their customers, an outstanding safety record, low driver turnover, and running very nice equipment, which is meticulously maintained,” adds Pinchuk.

This acquisition will allow Hirschbach to expand their freight capacity and offer additional services to their customers.

“Our customers on both our OTR and Dedicated divisions are asking us for more capacity; the Lessors acquisition will allow us to fill many of those requests,” said Pinchuk.

Started in 1983 by James and Wendy Shapiro, Lessors, Inc. built an excellent reputation as a full service refrigerated motor carrier specializing in transporting time sensitive, temperature-controlled products, and operated with three terminals in Eagan, MN; Dover, FL and Caldwell, ID.

“We’re honored that they’ve entrusted Hirschbach to take care of their hard-working team!”
