

MODERNIZE YOUR FOOD & BEVERAGE SUPPLY CHAIN

A guide to lowering costs and improving customer service
with streamlined, integrated, and data-driven operations

Supply Chain Management: Yesterday vs. Today

The world's gigantic leap into digital global commerce has changed how goods are delivered to customers. Yet many food and beverage companies fall somewhere closer to yesterday than today in terms of supply chain modernization — which means missed opportunities to reduce costs and complexity, respond to customer needs, and improve customer experience (CX).

Yesterday

- Full truckloads = efficiency
- Reactive and planning-focused
- Siloed functions and linear processes
- Limited data and visibility
- Single-point software solutions
- Disconnected service providers
- Emails and reports
- Cost-driven KPIs

Today

- Agility = efficiency
- Proactive and action-focused
- Integrated and flexible processes
- Data-driven and transparent
- Unified platform of shared applications
- Optimized services via provider networks
- Mobility, on-demand insight, real-time data
- Customer-centric KPIs

66%

of supply chain professionals agree that

“Delivering an enhanced customer experience is a defined and measured objective for my organization.”

Networked Partners: The New Supply Chain Advantage

So, what's a frustrated food and beverage corporate leader to do to loosen this vise on supply chain costs and performance?

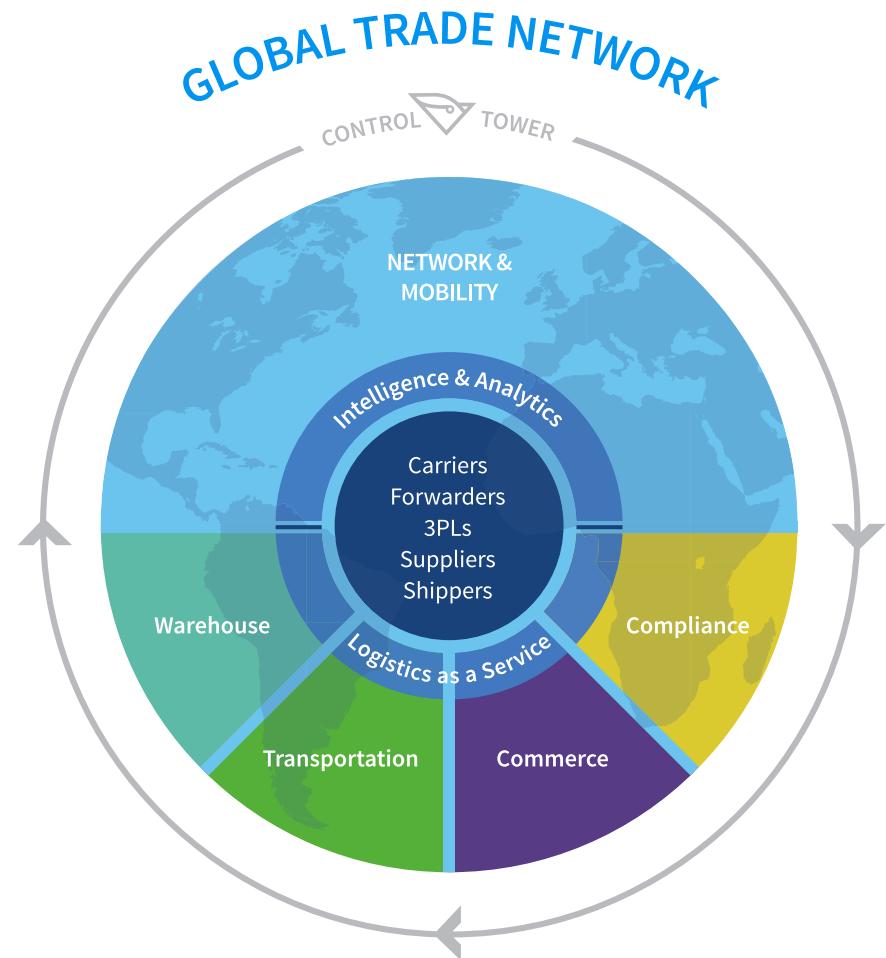

The answer is to take a different approach: Resist the temptation to zero in on cost alone. Higher velocity at global scale is how modern supply chains manage cost while effectively managing customer experience, dynamic demand, and changing market conditions.

BluJay unlocks the power of universally connected partners to align planning and operations with the new supply chain economics.

BluJay Global Trade Network

- Optimizes business processes and provides more data for deeper visibility
- 40,000+ universally connected partners
- Enables greater trade velocity through future-impacting insight

Outsourcing Supply Chain Integration Refocuses IT on Value Creation

Quorn creates meat-free protein sold in 19 countries. The company's on-premise electronic data interchange (EDI) solution lacked the agility to scale with the company's growth plans.

CASE STUDY

Supply Chain Challenges

- Supporting acceleration of growth
- Heavy reliance on in-house IT staff
- No tolerance for process disruption due to high demand
- Inferior visibility into EDI messaging

Modernized Supply Chain

- Outsourced help for complex supply chain integration
- Flexible framework can be tailored through configuration
- Supports any collaborative order fulfillment and control processes
- IT resources focused on value creation, not tasks

BluJay Solutions Can Modernize Food and Beverage Supply Chains

The BluJay platform includes multiple applications to effectively manage the complex movement of inbound and outbound goods so that food and beverage companies can:

- Monitor for shelf life, expiration dates, weights, storage limitations, and more
- Obtain real-time visibility for hundreds, if not thousands, of participants up and down the supply chain
- Gain visibility, maintain compliance, and protect brand integrity with full track-and-trace capabilities throughout the entire process
- Benchmark rate and service KPIs and make informed decisions based on a real-world freight rate index for contract and spot markets
- Scale as needed on an integrated, streamlined, and flexible platform

Moving to an Integrated Platform Eliminates Blind Spots and Slowdowns

Dannon, which ships more than 6 million cups of yogurt daily, needed better transportation visibility and more efficient scheduling to satisfy customers.

CASE STUDY

Supply Chain Challenges

- Extreme competition requires speed and efficiency
- Traceability for hundreds of shipments daily from 9 sites, plus third-party carriers
- Time-consuming manual scheduling processes
- Limited visibility into transportation schedules

Modernized Supply Chain

- SaaS system supports planning, execution, claims and appointment scheduling
- Complete visibility into carriers' schedules, which reduces detention costs
- CRMs can see current status of loads quickly and easily for better customer service

BluJay's Solution: Transportation Management

BluJay Solutions

Experts in supply chain solutions, powered by the Global Trade Network, to help get your products where they need to go, safely and efficiently.

Transportation Management

Industry-leading transportation management for shippers, forwarders, and logistics service providers. Transportation Management handles every mode and harnesses the power of the Global Trade Network (GTN) with macro-optimization.

Parcel

Industry-leading, high-volume parcel management platform with the flexibility and configurability to be deployed seamlessly with your desired workflow.

MobileSTAR

Configurable, flexible application connecting shippers, operations, drivers, and customers with real-time data and automated workflows for optimal last-mile delivery experience.

Commerce

A web-based supply chain solution that enables the electronic exchange of order data/documentation and automates the direct dispatch/drop-ship process.

Customs Management

One point of interface for customs regimes around the world. Reduce errors, lower your costs, and make your borders friction-free.

Control Tower

Sitting over it all, Control Tower provides real-time visibility tracking from origin to destination, and all points in between.

Easier Integration of New Partners Supports Profitable Growth

Established in 1846 by its namesake family, Heineken has grown into a global brand with operations in more than 70 countries. This growth was welcomed, but it also complicated day-to-day supply chain operations, ultimately resulting in high complexity.

CASE STUDY

Supply Chain Challenges

- Supporting continued growth
- Siloed business units
- Multiple locations
- Complex planning process

Modernized Supply Chain

- Fully hosted and managed EDI service — no longer reliant on in-house solutions and resources
- Streamlined onboarding for new partners and messages
- Flexible platform that supports EDI expansion
