Leading supplier of advanced valves and regulators for the LPG industry renews commitment to Canadian marketplace backed by the industry's best 10-year warranty.

RegO Consolidates Distribution Network in Canada

ELON, N.C. (January 20, 2021) – [RegO](#), the leading provider of advanced valves and controls for liquid and gas in the LPG, LNG, cryogenic and industrial gas industries, has consolidated its network of wholesale distributors in Canada. RegO's complete product portfolio of LPG regulators, valves, and tank fittings is now available exclusively from Diversco Supply for the entire country of Canada.

"RegO is committed to serving our propane customers in Canada, with reliable, top quality products that are 100% 'Made in America,'" said Bob Paul, RegO Vice President of Sales. "Diversco has been a trusted RegO partner for over 20 years and is positioned well with six stocking locations to cover Canada. Our customer research shows that more than 85% of LP gas marketers strongly prefer tanks and fittings that are made in America and backed by the best 10-year warranty in the industry. Our distribution network is designed to ensure that they continue to have that option. While all other major regulator suppliers have chosen to move production offshore, RegO has continued our commitment to maintaining world-class manufacturing capability here in North America".

"RegO's and Diversco's partnership in Canada ensures that propane dealers in the region will have access to the full product line of RegO products, and Diversco turnkey transportation and logistics", added Paul. A complete listing of RegO's product portfolio is available on the RegO website.

"We are excited for the next chapter of the RegO & Diversco partnership in Canada and look forward to working together to continue to bring innovative and quality products to customers in the Canadian marketplace," said Corey Boone, Diversco President (LPG). "Our team has worked hard to build the RegO brand in Canada over the past 20 years and it's a testament to that effort that we have been awarded this opportunity".

About RegO Products

[RegO](#)® has manufactured gas control products since 1908, with pioneering gas control solutions that helped launch the LP gas industry. The company invented the MultiValve® assembly that combined several valves into one, Chek-Lok® & MultiPort® assemblies, as well as filler valves, and pop action relief valves. Today, RegO is a global provider to the LPG, LNG, cryogenic, and industrial gas industries, with distribution centers located around the world. RegO products are manufactured in the USA at four facilities in North Carolina, using only the highest quality materials, careful machining with exacting precision requirements, and stringent quality control. All products are 100% tested for reliable performance. All RegO LP-Gas products feature an industry-leading 10-year warranty. RegO distributors are indispensable contributors to the company's success as valuable partners in serving customers, and are supported by RegO with training, inventory, and technical support.
